MCGD-WHO ARE WE?

Marshall County Gas District is a natural gas utility with a transmission and distribution system. The transmission system consists of 85 miles of pipeline, which runs from a connection point near Tarrant City in Jefferson County to a point near Scottsboro in Jackson County. The distribution system provides natural gas to consumers in substantially all areas of Marshall County except the City of Boaz. We serve portions of Blount, Cullman, Etowah, Jackson, Jefferson, and Madison Counties. The Gas District currently has 20,200 customers which consist of residential, commercial, poultry, and industrial customers.

We are committed to providing you with a safe and reliable natural gas service, and our ongoing safety and damage prevention programs are designed to help you recognize, react to, and prevent unsafe conditions.

SIGNS OF A NATURAL GAS LEAK?

- Blowing or hissing sound
- Dust blowing from a hole in the ground
- Continuous bubbling in wet or flooded areas
- Gaseous or hydrocarbon odor
- Dead or discolored vegetation in a green area
- Flames, if a leak has ignited

WHAT TO DO IF YOU HAVE A PIPELINE LEAK?

Your safety should be your first concern:

- Evacuate the area and prevent anyone from entering
- Abandon any equipment being used near the area
- Avoid any open flames
- Avoid introducing any sources of ignition to the area (such as cell phones, pagers, 2-way radios)
- Do not start/turn off motor vehicles/ electrical equipment

- Call 911 or contact local fire or law enforcement
- Notify the pipeline company
- Do not attempt to extinguish a natural gas fire
- Do not attempt to operate any pipeline valves

PIPELINE SAFETY

System failures occur infrequently along the nation's network of interstate natural gas pipeline facilities, and many of these are caused by damage from others digging near the pipeline. We watch found authorized digging, but we request your help to notify us.

ALWAYS CALL 811 BEFORE YOU DIG!

PIPELINE LOCATION AND MARKERS

Pipeline markers are used to indicate the approximate location of a natural gas pipeline and to provide contact information. Aerial patrol planes also use the markers to identify the pipeline route. Markers should never be removed or relocated by anyone other than a pipeline operator.

You can also find out where other companies' pipelines are in your area by going to the National Pipeline Mapping System website at www.npms.phmsa.dot.gov.

EMERGENCY CONTACT: 1-800-552-1382

PRODUCTS/DOT GUIDEBOOK ID#/GUIDE#:

Natural Gas	1971	115
