ABOUT RIVIERA UTILITIES

Riviera Utilities operates Natural Gas Distribution pipelines within Alabama. Riviera Utilities receives Natural Gas from Gulf South Pipeline, who transports natural gas from remote production areas to local natural gas processing facilities where natural gas liquids (NGLs) are extracted before transportation to City Gate Stations. At this point, Riviera purchases the un-odorized gas and injects the odorant that has the distinct smell of natural gas. From there, natural gas is delivered to residential, business and industrial users.

PRODUCTS TRANSPORTED

Product	Leak Type	Description
Natural Gas	Gas	<p>Vapor: Lighter than air. Very flammable and a white vapor cloud may be visible near the site of a leak.</p> <p>Health Hazards: Extremely high concentrations may cause irritation or asphyxiation. Possible presence of H₂S, a toxic gas.</p> <p>Fire Hazards: Extremely flammable and easily ignited by heat, sparks or flames.</p>
