ABOUT SHORE TERMINALS LLC

Shore Terminals LLC is a subsidiary of NuStar Energy L.P. (NuStar), which is a publicly traded, limited partnership based in San Antonio, Texas. Shore Terminals LLC operates a petroleum bulk storage facility and associated short pipelines in Contra Costa County near Crockett, and a pipeline in Los Angeles county CA.

WHAT DOES NUSTAR DO IF A LEAK OCCURS?

To prepare for the event of a leak, pipeline companies regularly communicate, plan and train with local emergency responders. Upon the notification of an incident or leak the pipeline company will immediately dispatch trained personnel to assist emergency responders.

Pipeline operators and emergency responders are trained to protect life, property and facilities in the case of an emergency.

Pipeline operators will also take steps to minimize the amount of product that leaks out and to isolate the pipeline emergency.

MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

Safety and environmental performance is NuStar's first priority. Ensuring the mechanical integrity of our pipelines

helps us to successfully meet our goal of protecting employees, customers, contractors, and the public and environment. The NuStar Pipeline Integrity Management Program defines how we work to achieve this goal and comply with applicable laws and regulations.

The NuStar Pipeline Integrity
Management Program assists us in
preventing leaks and spills, determining
pipelines that could affect High
Consequence Areas (HCA's), and
identifying evaluation and
improvement opportunities.

PRODUCTS TRANSPORTED

Product: Hazardous Liquids [such as: crude oil, diesel fuel, jet fuel, gasoline, and other refined products]

EMERGENCY CONTACT: 1-800-433-4250 - Selby 1-800-481-0038 - Wilmington

PRODUCTS/DOT GUIDEBOOK ID#/GUIDE#:Petroleum Products 1267 128

CALIFORNIA COUNTIES OF OPERATION:

Contra Costa

Los Angeles

Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.

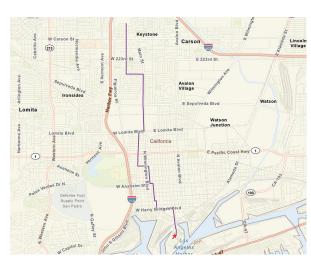

Leak Type: Liquid

Vapors: Initially heavier than air and spread along ground and collect in low or confined areas. Vapors may travel to source of ignition and flash back. Explosion hazards indoors, outdoors or in sewers.

Health Hazards: Inhalation or contact with material may irritate or burn skin and eyes. Fire may produce irritating, corrosive and/or toxic gases. Vapors may cause dizziness or suffocation. Runoff from fire control or dilution water may cause pollution.
