ABOUT SABLE OFFSHORE CORP.

Sable Offshore Corp. is a Houston based independent energy company committed to the safe, efficient and environmentally responsible production and transportation of energy.

PIPELINE INTEGRITY

We follow a comprehensive integrity management system that requires compliance with all applicable laws and regulations and systematic identification and management of safety, health and environmental risks. We regularly test and maintain our pipelines using cleaning devices, diagnostic tools and cathodic protection to detect and prevent corrosion.

We patrol our pipeline routes using ground and air surveillance and will closely monitor our operations through a 24- hour control center. Our control center will include sophisticated computers, alarms and other technologies used to monitor and control our pipeline systems and enables us to implement immediate protective measures should a leak be detected.

HOW YOU CAN HELP KEEP PIPELINE SAFE

- Keep the rights of way near or on your property clear of any kind of obstruction. Property owners should not dig, build, store or place or plant anything on the right of way. Pipeline rights of way must be kept free of structures and other obstructions in order to provide us access to the pipeline for maintenance, assessments, as well as in the event of an emergency.

- Before beginning work on any excavation project, especially those near a pipeline (marked by a pipeline marker), call 811 -- the national one-call number -- or your state's One Call System. Every digging job requires a call -- even small projects like planting trees or shrubs. It is for your safety and that of the public. It is a free call-- and it is the law! You can find out more about pipelines operating in your area from the National Pipeline Mapping System - www.npms.phmsa.dot.gov.
- Report any unusual sounds, smells or suspicious activity to our 24-hour emergency number, 1-805-567-9543. You can call us at any time with your concerns.

SIGNS OF A LEAK

Petroleum pipelines carry both gaseous and liquid materials that can burn or explode if exposed to a spark or other ignition source. Many liquids form gaseous vapor clouds when released into the air. Pipelines may contain colorless and odorless products. Some pipeline gases are lighter than air and will rise. Others are heavier than air and will stay near the ground, collecting in low spots. Any pipeline leak is potentially dangerous.

Markers that indicate the location of pipelines may include warning signs, aerial patrol markers, casing vents and painted metal, and wooden or plastic posts.

By sound:

- Unusual noises, such as hissing or roaring

By smell:

- Unusual petroleum, chemical or sulfuric "rotten egg" smell

EMERGENCY CONTACT: 1-805-567-9543

PRODUCTS/ DOT GUIDEBOOK ID#/ GUIDE#:		
Crude Oil	1267	128

CALIFORNIA COUNTIES OF OPERATION:

Kern Santa Barbara
San Luis Obispo

Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.

By sight:

- Liquid or frozen ground near a pipeline right-of-way
- Water bubbling or being blown into the air
- Discolored or abnormally dry soil
- Rainbow or oily sheen on water surfaces
- A fire or explosion
- Dense white cloud or fog
- Discolored vegetation

IF YOU SUSPECT A PIPELINE IS LEAKING

- Immediately leave the area and move upwind from the suspected release.
- Do not touch, breathe or make contact with the suspect liquid.
- Do not use a lighter or match, start an engine, use a mobile phone or light switch, or do anything that might create a spark.
- Do not drive into a release or its associated vapors.
- From a safe location: First call 911.
- Then call Sable Offshore Corp.'s emergency number: 1-805-567-9543.
- Do not attempt to operate any pipeline valves or other equipment, as this could make the situation worse.

EMERGENCY RESPONSE

At Sable Offshore Corp., we work hard to prevent a pipeline incident, but in the unlikely event of a pipeline emergency, we are prepared to respond quickly. We regularly communicate, plan and drill with your local emergency personnel, such as fire and police departments, to ensure our response to an incident is well-coordinated and effective.

CONTACTS

Contact list subject to change. In case of emergency or suspected pipeline incident, always call the 24- Hour Emergency Hotline:
(805) 567-9543 and 911.
