ABOUT PENSACOLA ENERGY

Pensacola Energy, the largest municipally-owned natural gas utility in Florida, is owned and operated by the City of Pensacola. Pensacola Energy provides natural gas service to City residents and much of unincorporated Escambia County.

NATURAL GAS - THE SAFE FUEL

After years of service in over 40 million American homes, natural gas has an impressive record of safety. Modern natural gas appliances are equipped

with many features to make them safer and more convenient to use. When properly installed and maintained, these appliances are among the safest on the market today.

Another factor that increases the level of safety of natural gas is the ease by which a natural gas leak can be detected. It may come as a surprise to you, but natural gas is completely odorless in its original state. We add a distinctive odor to natural gas to make it easy to detect.
