**COMPANY INFORMATION, ASSETS & PRODUCTS TRANSPORTED**

The Dixie Pipeline System extends approximately 1,300 miles from Texas to North Carolina. This system transports propane, from fractionators in Texas, Louisiana and Mississippi to customers throughout the Southeast.

**LOCATING DIXIE PIPELINES – PIPELINE VIEWER TOOL**

To find more information regarding location and products transported in our pipelines within one (1) mile of a specific address, visit our website at: [www.enterpriseproducts.com/pipeline-safety/pipeline-viewer](http://www.enterpriseproducts.com/pipeline-safety/pipeline-viewer). Please note the asset map and pipeline viewer tool are for informational purposes only.

**EMERGENCY RESPONSE PLAN**

An Emergency Response Plan is developed for each pipeline facility to contain, control and mitigate the various types of emergency conditions/situations that could occur at one of our facilities. For more information regarding Dixie Pipeline emergency response plans and procedures, contact us at [publicawareness@eprod.com](mailto:publicawareness@eprod.com).

**EMERGENCY RESPONSE CAPABILITIES**

The Company's qualified personnel are trained in safe operations and emergency response activities and participate in exercises reflecting various types of emergency scenarios and environmental sensitivi-

ties. In addition, we maintain a well trained team of employees from various Company locations as members of the Corporate Emergency Organization. This team, as well as an array of emergency response equipment (including, but not limited to, cell phones, fire extinguisher, supplied breathing air, and air monitoring equipment), can be mobilized and deployed to assist in handling emergency situations that may occur at a Company facility or pipeline location.

Dixie Pipeline utilizes its 24-hour/365 day a year, Pipeline Operations Control Center (888-883-6308) as a hub of communications in emergency response situations. Our manned control center monitors the flow, pressure, temperatures, and other conditions throughout the pipeline systems and is an integral part of our communication during emergency situations.

**DIXIE PIPELINE'S RESPONSE IN AN EMERGENCY**

- We will immediately dispatch personnel to help handle the emergency at the site.
- We will provide information to public safety officials to aid in their response to the emergency.
- We will take necessary operating actions such as closing and opening valves to minimize the impact of the leak.
- Public safety personnel and others unfamiliar with the pipeline should not attempt to operate any of the valves on the pipeline, unless instructed to do so by Dixie Pipeline personnel. Improper operation of the pipeline valves could make the situation worse and cause other accidents to happen.

**INCIDENT COMMAND SYSTEM**

Dixie Pipeline utilizes an expandable Incident Command System. Depending upon the size and complexity of an incident, additional Company or contract personnel may be added as needed. Additional federal, state or local agencies may be integrated into the Incident Command System by utilizing a Unified Command Structure.

**EMERGENCY CONTACT:**
