

ABOUT CITGO PETROLEUM CORPORATION

CITGO Petroleum Corporation (CITGO), headquartered in Houston, Texas, operates several hazardous liquid pipelines associated with fuel terminal facilities. These short pipeline systems are located in the states of Illinois, Indiana, Michigan, Ohio, New Jersey and Florida and they transport Gasoline, Diesel Fuels, Aviation/Turbine Fuels and Butane.

WHAT DOES CITGO PETROLEUM CORPORATION DO IF A LEAK OCCURS?

To prepare for the event of a leak, CITGO regularly communicates, plans and trains with local emergency responders. Upon the notification of an incident or leak CITGO will immediately dispatch trained personnel to assist emergency responders.

CITGO employees and emergency responders are trained to protect life, property and facilities in the case of an emergency.

CITGO personnel will also take steps to minimize the amount of product that leaks out and to isolate the pipeline emergency.

MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

CITGO invests significant time and capital maintaining the quality and integrity of our pipeline systems. The CITGO Arlington Heights Terminal is monitored locally to assure operational safety. CITGO also utilizes on-ground observers to identify potential hazards. Facility operational personnel continually monitor and assess changes in pressure and flow of the Arlington Heights Terminal. They will notify Arlington Heights Terminal field personnel if there is a possibility that a leak has occurred. CITGO will immediately access the Arlington Heights Terminal to operate shut-off valves utilized to isolate a potential leak.

COUNTIES OF OPERATION:**

Cook

Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.

CITGO Petroleum Corporation has developed supplemental hazard and assessment programs known as Integrity Management Programs (IMPs). Specific information about CITGO's program may be obtained by contacting us directly.

HOW TO GET ADDITIONAL INFORMATION

For an overview of CITGO's IMP, contact us at 800-471-9191.

PRODUCTS TRANSPORTED IN YOUR AREA

PRODUCT	LEAK TYPE	VAPORS
HAZARDOUS LIQUIDS [TURBINE FUEL]	Liquid	Initially heavier than air and will spread along ground. Will collect on low or confined space areas. Vapors may travel to source of ignition and flash back. Explosion hazards indoors, outdoors or in sewers.
HEALTH HAZARDS	Inhalation or contact with material may irritate or burn skin and eyes. Fire may produce irritating, corrosive and/or toxic gases. Vapors may cause dizziness or suffocation. Runoff from fire control or dilution water may cause pollution.

PRODUCTS TRANSPORTED IN YOUR AREA

PRODUCT	LEAK TYPE	VAPORS
HAZARDOUS LIQUIDS [SUCH AS: CRUDE OIL, DIESEL FUEL, JET FUEL, GASOLINE, AND OTHER REFINED PRODUCTS]	Liquid	Initially heavier than air and spread along ground and collect in low or confined areas. Vapors may travel to source of ignition and flash back. Explosion hazards indoors, outdoors or in sewers.
HEALTH HAZARDS	Inhalation or contact with material may irritate or burn skin and eyes. Fire may produce irritating, corrosive and/or toxic gases. Vapors may cause dizziness or suffocation. Runoff from fire control or dilution water may cause pollution.	
HIGHLY VOLATILE LIQUIDS [SUCH AS: BUTANE, PROPANE, ETHANE, PROPYLENE, AND NATURAL GAS LIQUIDS (NGL)]	Gas	Initially heavier than air, spread along ground and may travel to source of ignition and flash back. Product is colorless, tasteless and odorless.
HEALTH HAZARDS	Will be easily ignited by heat, sparks or flames and will form explosive mixtures with air. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at high concentrations. Contact with gas or liquefied gas may cause burns, severe injury and/or frostbite. Fire may produce irritating and/or toxic gases.
