ABOUT NUSTAR PIPELINE OPERATING PARTNERSHIP L.P.

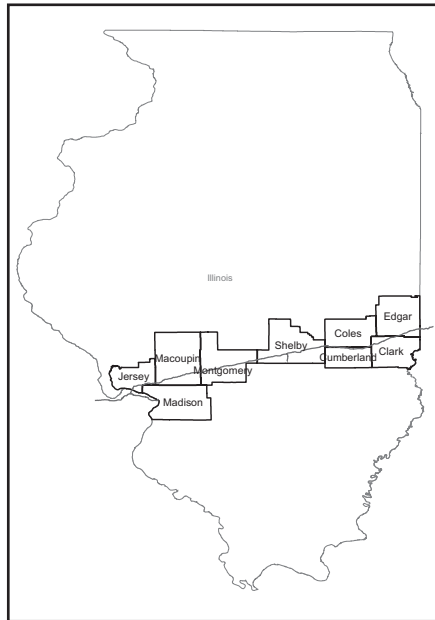

NuStar Pipeline Operating Partnership L.P. is a subsidiary of NuStar Energy L.P., a publicly traded company based in San Antonio, TX that currently has more than 9,200 miles of pipeline and 81 terminal and storage facilities that store and distribute crude oil, refined products and specialty liquids. The partnership's combined system has more than 96 million barrels of storage capacity at its facilities around the world, and NuStar has operations in the United States, Canada, Mexico, the Netherlands, including St. Eustatius in the Caribbean, and the United Kingdom. For more information, visit NuStar Energy's Web site at www.nustarenergy.com.

The Central East Region is operated by NuStar Energy L.P.'s subsidiary, NuStar Pipeline Operating Partnership L.P. The Central East Region's business consists primarily of the operation of a pipeline system that transports refined petroleum products, including gasoline, diesel, and propane. The system is operated as a common carrier in Kansas, Nebraska, Iowa, South Dakota, North Dakota and Minnesota. The system includes 2,530 miles of pipelines that transport an av-

erage of 203,000 barrels per day and 21 distribution terminals with a storage capacity of 4.8 million barrels, and two storage facilities at McPherson, KS and El Dorado, KS with a storage capacity of approximately 1.1 million barrels. Most of the petroleum products transported by the system are received from refineries in southeast Kansas, northeast Oklahoma, and central North Dakota. The Central East Region's business also includes an anhydrous ammonia pipeline system. The ammonia system is operated as a common carrier in Louisiana, Arkansas, Missouri, Illinois, Indiana, Iowa, and Nebraska. The ammonia system includes approximately 2,200 miles of pipelines that transport approximately 1.26 million tons per year (11.7 million barrels). The ammonia system is capable of receiving ammonia from three customer owned and operated marine terminals in Louisiana, and the ammonia system is capable of delivering ammonia to 22 customer owned and operated distribution terminals in the Midwest and to a number of customer owned and operated industrial locations. Anhydrous ammonia is primarily used as agricultural fertilizer, and anhydrous ammonia is also used as a feedstock in a number of industrial applications.

COMMITMENT TO SAFETY, HEALTH & ENVIRONMENT

At NuStar, the health and safety of our personnel, customers, and neighbors and the protection of the environment are core business values. NuStar is committed to achieving health, safety and environmental (HSE) excellence throughout the organization. NuStar emphasizes its HSE commitment through internal audits, public awareness, damage prevention, pipelines integrity management, emergency response preparedness, and other programs. In addition, most of NuStar's pipelines are operated via satellite communication systems from a central control room located in San Antonio, TX. This control center is equipped with state-of-the-art computer systems designed to continuously monitor real-time operational data, operate equipment associated
