## ABOUT WOLVERINE PIPE LINE CO.

Wolverine Pipe Line Co. (Wolverine) is a transportation service company, headquartered in Portage Michigan and incorporated in 1952. Wolverine transports liquid petroleum products through 630+ miles of active steel pipelines through three states; connecting Chicago refineries to terminals in northwest Indiana and Michigan.

## COMMITMENT TO SAFETY, HEALTH AND THE ENVIRONMENT

Wolverine strives to conduct its business in a manner that protects the environment and the safety and health of the public, emergency responders, customers & employees. We are committed to continuous efforts to identify and eliminate safety risks associated with our operations.

As your neighbor, Wolverine works hard to operate in a safe and environmentally responsible manner. We adhere to all applicable environmental, construction and pipeline design regulations and apply industry standards where laws or regulations do not exist.

## SIGNS OF A PIPELINE LEAK

The following are indications of a possible pipeline leak:

- Brown or discolored vegetation
- Dirt being blown into the air
- Sheen on water surfaces
- Fire at or below ground level
- Stains or pools of hydrocarbons not usually present
- Continuous bubbling in water
- An unusual hissing or roaring noise
- An unusual odor such as gasoline, oil, or sulfur

## EMERGENCY RESPONSE ACTIONS

In the event of an emergency, Wolverine would take the following actions:

- Shut down and isolate the pipeline by closing valves
- Dispatch trained personnel to the scene
- Work with emergency responders and the public in the affected area
- Contain and remove released product

## PRIORITIES FOR MANAGING A PIPELINE INCIDENT

- Safety First – Consider your safety and the safety of the public.
  - Shut down motor vehicles and remove ignition sources from the area
  - Establish a safe perimeter around the incident site
  - Stay upwind or uphill
  - Only enter hazardous area if you are properly trained and equipped
- Isolate the area and size up the incident
  - Secure the site
  - Establish hot, warm, and cold zones
  - Establish security
- Identify the operator
  - Look for pipeline markers
- Contact the Operator
  - Exchange location, nature of the problem, and a telephone number at which someone can be reached
