

Sinclair Transportation Company is a division of Sinclair Oil Corporation, a privately held company based in Salt Lake City Utah. Sinclair operates two refineries with a combined refining capacity of 108,000 BPD. Take to the highway in twenty-one states in the West and Midwest and you'll discover over 2,600 retail stations and convenience stores proudly displaying the Sinclair Dinosaur. We operate 8 refined product terminals and close to 1,100 miles of pipeline transporting crude oil, and refined products. Our Mid Continent Pipeline District includes a 210 mile refined products pipeline that supplies fuel to our Carrollton, Missouri and Montrose, Iowa terminals.

COMMITMENT TO SAFETY, HEALTH, & ENVIRONMENT

Public and environmental safety is the highest priority in the operation and maintenance of Sinclair's pipeline system. Sinclair employs a qualified staff of professionals that are committed to safely transporting petroleum products. In the event of a pipeline emergency, our field personnel are trained and fully prepared to respond. Our response personnel coordinate their efforts with local police and fire departments and other emergency responders.
