 Website: www.atmosenergy.com

Atmos Energy Corporation is one of the largest natural gas distribution companies in the United States, delivering natural gas to more than 3 million residential, commercial, industrial and public-authority customers. We have grown from 279,000 customers in 1983 mainly by acquiring utility assets. Our regulated distribution operations serve more than 1,400 communities in eight states.

Because of the geographical breadth of our operations, we benefit from diversity in economic conditions, weather patterns, gas supplies and regulatory climates. Our employees are actively involved in community activities, serving on boards, and volunteering.

Our business strategy focuses today on modernizing and expanding our regulated natural gas distribution and transmission assets. We have under way or have recently completed programs in all our states of operation to replace aging pipeline infrastructure. Besides increasing the safety and reliability of our system for our customers and the public, our strategy is providing more stable earnings for our investors.

Atmos Energy's non regulated operations are ranked as one of the leading

domestic mid-tier gas marketers. They market natural gas supplies to industrial, commercial and municipal customers primarily in the Midwest and Southeast, arrange for gas transportation and management services, and manage company-owned gas storage and pipeline assets.

### COMMITMENT TO SAFETY, HEALTH & ENVIRONMENT

Safety is a main concern of Atmos Energy. No reason can justify endangering customers, the public or employees. Safety at Atmos Energy is the responsibility of every employee regardless of his or her position. Atmos Energy is committed to:

- Providing a safe, healthy and stable work environment for all employees
- Delivering safe, efficient and affordable service to its customers
- Enhancing public safety through safe work practices and public education
- Complying with federal, state, and local regulations as they pertain to Atmos Energy's daily operations.
