

Rose Rock Midstream, LP gathers, transports and stores crude oil and condensates from independent producers and operators as well as aggregators and independent refiners located in Colorado, Kansas, North Dakota, Louisiana and Oklahoma. The crude oil and condensate is transported via tank trucks and pipelines to the Cushing, Oklahoma Interchange. Rose Rock and its parent company, SemGroup, are headquartered in Tulsa, Oklahoma. Rose Rock also has offices in Cushing, Oklahoma; Stafford and Wichita, Kansas; Williston, North Dakota; LaPlace, Louisiana; Hudson, Colorado; and Houston, Texas.

COMMITMENT TO SAFETY, HEALTH & ENVIRONMENT

In all aspects of our business and operations, Rose Rock constantly strives for the highest level of performance in regard to environmental, health and safety issues. This corporate responsibility is a reflection of our core value to conduct business in a socially responsible and ethical manner with all stakeholders.

Rose Rock invests significant time and capital maintaining the quality and integrity of our pipeline system. The pipeline is monitored 24 hours a day via a manned

control center in Tulsa, Oklahoma. Aerial surveillance is also used to monitor the condition of the pipeline right of way and identify potential hazards. The Control Center personnel continuously monitor the pipeline system and assess changes in pressure and flow. Field personnel are notified to respond if there is an unexplained flow deviation.

EMERGENCY PREPAREDNESS

Rose Rock personnel regularly communicate, plan and train with local emergency responders. Upon notification of an incident or leak the pipeline company will immediately dispatch trained personnel to assist emergency responders. Rose Rock personnel and emergency responders are trained to take steps to minimize the impact to the environment and the public. Contact Rose Rock directly for information regarding our emergency response plan.

INTEGRITY MANAGEMENT

In accordance with federal regulatory requirements, Rose Rock Midstream has developed a hazard and assessment program known as an Integrity Management Program (IMP). This program focuses on the identification and mitigation of hazards to the pipeline system. Specific information about Rose Rock's program may be found by contacting our Integrity Manager, Mr. O.C. Simpson, at 918-524-7317

CALL BEFORE YOU DIG!

Call 811 each time you have work that requires digging. One easy call to 811 from anywhere in the US starts the process to get your underground pipeline and utility lines located and marked for FREE. Once the underground lines have been marked, you will know their approximate location and may dig safely. For more information see <http://www.call811.com>.

NATIONAL PIPELINE MAPPING SYSTEM

The US Department of Transportation, Pipeline and Hazardous Materials Safety Administration, Office of Pipeline Safety has created a web-based system that can be accessed to identify pipeline operators with transmission pipelines in your area and their contact information. To access the system go to <http://www.npms.phmsa.dot.gov/>
