Vinland Energy is a natural gas company engaged in the exploration, development, production, and acquisition of natural gas along with transportation and sales of natural gas to main delivery points on major pipeline systems.

It fuels our cars, heats our homes, and cooks our food. It is the lifeblood of world trade and economics, and everyday our dependence on this precious commodity grows. It is estimated that we use approximately four times the amount of energy our great grandparents used.

Never before has the world's growing population demanded more from Earth's natural resources, and never before has there been such a demand for reliable, clean, and efficient energy. Vinland Energy is rising to meet this demand.

Based in Lexington, Kentucky, Vinland Energy is one of the largest independent producers of oil and natural gas in Kentucky. Vinland Energy has always set itself apart from other energy production companies through its aggressive planning and strategic growth. Vinland Energy is interested in the long term

growth of the company and the longevity of it. That's why Vinland continues to invest back into that.

"Short term means nothing to us, because in the business, there is no such thing as 'short term.' The life of the wells is at least forty years, so how can you not be in for the long haul?"

Q: WHAT IS 811?

811 is the national, federally-mandated N-11 number designated by the FCC to consolidate all local "Call Before You Dig" numbers and help save lives by minimizing damages to underground utilities. One easy phone call to 811 connects you to Kentucky 811 to begin the process of getting underground utility lines marked. Kentucky 811 personnel will then notify affected utility companies, who will continue to mark underground lines for free.

Q: WHY SHOULD I CALL KENTUCKY 811 BEFORE EVERY DIG?

Calling Kentucky 811 will help save lives and protect infrastructure. Knowing where underground utility lines are buried before each digging project begins helps protect you from injury,

Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.

expense and penalties. The depth of utility lines varies and there may be multiple utility lines in the same area. Even simple digging projects can damage utility lines and can disrupt vital services to an entire neighborhood, harm diggers, and potentially result in expensive fines and repair costs. Marked lines show diggers the approximate location of underground lines and help prevent undesired consequences.

Q: I'M JUST A HOMEOWNER, NOT A CONTRACTOR - IS KENTUCKY 811 FOR ME?

Calling Kentucky 811 is for professional excavators and do-it-yourself homeowners. A recent national survey revealed that roughly half of Americans are "active diggers" who have done (or are planning to do) some type of digging project at home. Whether you are a professional excavator or an avid do-it-yourselfer, you need to call Kentucky 811 before every dig, every time.

Q: WHAT TYPES OF PROJECTS REQUIRE A CALL TO KENTUCKY 811?

- Planting a tree
- Building a deck
- Installing a mailbox
- Installing a fence
- Landscaping
