OVERVIEW

Boardwalk Louisiana Midstream, LLC (BLM) provides liquids storage and pipeline transportation, as well as brine supply services for regional producers and consumers of petrochemicals, natural gas liquids ("NGLs"), olefins and natural gas. Operations are conducted through strategically located hubs serving two petrochemical industrial centers in Louisiana as well as one interstate ethylene pipeline, Evangeline Pipeline, owned by BLM's affiliate, Boardwalk Petrochemical Pipeline (BPP), running from East Texas to the Mississippi River Corridor.

COMMITMENT TO SAFETY, HEALTH & THE ENVIRONMENT

BLM is committed to the protection of the public and the environment through the safe operation and maintenance of its pipeline systems. BLM's qualified personnel are trained in emergency response activities and regularly participate in drills and exercises reflecting various types of response levels, emergency scenarios, topographic terrain and environmental sensitivities. BLM has committed the necessary resources to fully prepare and implement its emergency response plans.

COMMUNICATIONS

BLM utilizes its 24-hour Pipeline Control Center (1-866-574-4483) as a hub of communications in emergency response situations.

The Control Center has a vast catalog of resources and capabilities. Onsite communications are conducted using cellular telephones, portable radios, satellite phones and/or landline telephone systems from company facilities and offices.

PIPELINE LOCATION AND MARKERS

The purpose of a pipeline marker is to identify a pipeline right-of-way and to provide information about BLM's pipelines including operator name; phone numbers, in case of a possible emergency; and the product inside. Markers indicate the general, not exact, location of a pipeline and do not necessarily follow a straight course between two markers. Never rely solely on the presence or absence of pipeline markers - someone may have moved or removed the marker. For additional information that is available for emergency responders, please see the PIMMA link on the National Pipeline Mapping System's website: npms.phmsa.dot.gov.

IN CASE OF AN EMERGENCY

Emergency preparedness and planning measures are in place at BLM in case a pipeline incident occurs. BLM also works closely with local emergency response organizations to educate them regarding our pipelines and how to respond in the unlikely event of an emergency. Should an emergency occur, BLM's objective is to resolve the situation quickly and safely. Two way communication with emergency responders is critical for this resolution. BLM needs immediate access to the incident location in order to assess and develop a plan to resolve the situation.
