ABOUT KINETICA PARTNERS LLC

Kinetica owns and operates over 1,600 miles of natural gas transmission and gathering pipelines. Our pipelines span the Louisiana Gulf Coast from Cameron Parish to Plaquemines Parish. Enroute, Kinetica owns Gas Separation / Dehydration facilities located in Patterson, Johnson Bayou, Pecan Island, and Cocodrie. Kinetica's Pecan Island, Leeville, Johnson Bayou, Patterson, and Cocodrie plants include liquids storage facilities.

Companies operating under the Kinetica umbrella are:

- Transmission
- Kinetica Energy Express, LLC
- Kinetica Deepwater Express, LLC
- Gathering
- Kinetica Midstream Energy, LLC

WHAT DOES KINETICA DO IF A LEAK OCCURS?

In the unlikely event of a pipeline emergency, pipeline operations personnel are extensively trained to respond. While the U.S. Department of Transportation's Pipeline and Hazardous Materials Safety Administration, also known as PHMSA, mandates certain basic areas of competency for pipeline operations employees, most operators provide extensive additional training.

Specific training on how to recognize and react to abnormal upsets and emergencies is a cornerstone of the training regimen for these workers. While other training consists of specifics related to the properties of the materials transported in the pipelines, a re-occurring focus is placed on how to protect the public, other responders, and the environment in the event of a product release. Pipeline personnel are also extensively trained on the location and functionality of above ground valves, the operation of valves and how to isolate pipeline segments. Only these employees should operate valves in the event of an emergency.

MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

Kinetica Partners, LLC has a comprehensive pipeline integrity management program for maintaining the reliability and safety of its pipeline systems. Proper inspection and maintenance is critical to safe and reliable pipeline operations. All gas transmission pipelines located in High Consequence Areas are subject to ongoing inspections, in compliance with federal regulations, specifically 49 CFR Part 192 subpart O. The Kinetica gas pipeline system integrity management program was developed to effectively evaluate and maintain the integrity of its pipeline systems. The program is designed to minimize the risks and consequences of having a gas pipeline failure that could impact populated areas and surrounding environments. Our integrity management program follows strict federal and state pipeline regulations that require companies to develop, maintain and continuously improve integrity management programs to protect high consequence areas (HCAs).

PRODUCTS TRANSPORTED

Product: Natural Gas
Leak Type: Gas

Vapors: Lighter than air and will generally rise and dissipate. May gather in a confined space and travel to a source of ignition.

Health Hazards: Will be easily ignited by heat, sparks or flames and will form explosive mixtures with air. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at high concentrations. Contact with gas or liquefied gas may cause burns, severe injury and/or frostbite.
