CL Chalmette Louisiana Liquids LLC

ABOUT SULPHUR RIVER EXPLORATION, INC

Sulphur River Exploration Inc operates and maintains petroleum pipelines located in Louisiana. You are receiving this safety information because you live, work or are a first responder near the pipeline. Please take a moment to review this information and keep it handy in case you need to reach out to Sulphur River Exploration Inc.

THE PRODUCT

Petroleum crude oil is a light to dark colored liquid hydrocarbon containing flammable gasses. It is not a uniform substance and its physical and chemical properties may vary from oilfield to oilfield or within wells located in the same oilfield. Light, sweet crude oils contain flammable gasses such as butane and propane (unless it is known that the gasses have been removed). These gasses can readily ignite if released, when they come in contact with an ignition source. These crude oils may also contain hydrogen sulfide, a toxic inhalation hazard material, in the vapor space of the tank car. Due to the characteristics of crude oil, in an accident scenario, the behavior of this product may range from that of gasoline for the lighter (sweet) crude oils to diesel fuel for the heavier (sour) crude oils.

According to National Transportation Safety Board statistics pipelines are the safest and most efficient means of transporting petroleum products. In the United States alone, there are over 200,000 miles of petroleum pipelines that transport over 700 million gallons of petroleum products per day.

DAMAGE PREVENTION

Most pipeline accidents occur when individuals are not aware of a pipeline's location before they begin excavation. You can help prevent pipeline incidents by contacting your state one call agency before you dig. One easy phone call to 811 gets the approximate location of underground utility lines marked for free. For more information go to: www.call811.com

Know what's below.
Call before you dig.

PIPELINE LOCATION INFORMATION

Pipeline markers are in pipeline rights-of-way and indicate the approximate location of the pipeline but not the depth of the pipeline. On these markers you will find the operator's name, emergency phone number and the product being transported in the pipeline.

EMERGENCY CONTACT: 1-877-465-1788
