

## ABOUT TALOS ENERGY VENTURES

Talos Energy Ventures LLC headquartered in Houston Texas, with offices in Lafayette La., is a energy company with operations mostly in the federal waters of the Gulf Of America. We currently have 577 employees.

## WHAT DOES TALOS DO IF A LEAK OCCURS?

To prepare for a response to a leak, Talos regularly communicates and plans with local emergency responders. Upon notification of an incident or leak, Talos will immediately dispatch trained personnel to assist emergency responders.

Talos pipeline operators are trained to protect life, environment, and property and will take steps to minimize the amount of product leak in the event of an emergency.

## MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

Talos invests significant time and capital maintaining the quality and integrity of its pipeline systems. Most active pipelines are monitored 24 hours a day. Additionally, Talos utilizes aerial surveillance and on ground observers to identify potential dangers. In the event of a leak the pipeline will be isolated immediately by field personnel who are on site 24 hours a day, and who will call out emergency response personnel.

All gas transmission and hazardous liquid pipeline operators, including Talos, have supplemental hazard and assessment programs known as Integrity Management Programs (IMPs). An IMP is a systematic approach to ensure safe and reliable operation of pipelines by assessing and mitigating risks throughout the pipeline lifecycle.

## PRODUCTS TRANSPORTED

**Product:** Crude Oil

**Leak Type:** Liquid

## EMERGENCY CONTACT:

713-470-0335

## PRODUCTS/DOT GUIDEBOOK ID#/GUIDE#:

## LOUISIANA

## PARISHES OF OPERATION:

Plaquemines

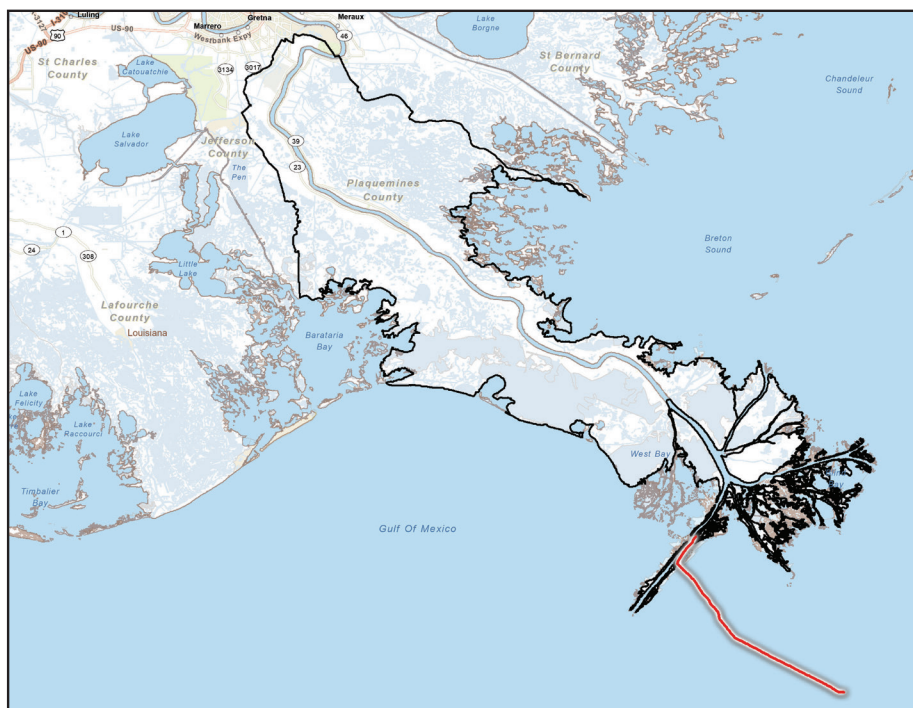

*Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.*

**Vapors:** Initially heavier than air and spread along ground and collect in low or confined areas. Vapors may travel to source of ignition and flash back. Explosion hazards indoors, outdoors or in sewers.

**Health Hazards:** Inhalation or contact with material may irritate or burn skin and eyes. Fire may produce irritating, corrosive and/or toxic gases. Vapors may cause dizziness or suffocation. Runoff from fire control or dilution water may cause pollution.

## HOW TO GET ADDITIONAL INFORMATION

For an overview of Talos's IMP, contact us at 713-328-3000.
