ABOUT TRANS-UNION INTERSTATE PIPELINE, L.P.

Trans-Union Interstate Pipeline, L.P., headquartered in Houston, TX, is a natural gas transmission system spanning 42 miles in the Southeast region of the United States.

Trans-Union Interstate Pipeline, L.P.'s pipeline system and facilities are located in Arkansas and Louisiana.

WHAT DOES TRANS-UNION INTERSTATE PIPELINE, L.P. DO IF A LEAK OCCURS?

To prepare for the event of a leak, pipeline companies regularly communicate, plan and train with local emergency responders. Upon the notification of an incident or leak the pipeline company will immediately dispatch trained personnel to assist emergency responders.

Pipeline operators and emergency responders are trained to protect life, property and facilities in the case of an emergency.

Pipeline operators will also take steps to minimize the amount of product that leaks out and to isolate the pipeline emergency.

MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

Trans-Union Interstate Pipeline, L.P. invests significant time and capital maintaining the quality and integrity of their pipeline system. Most active pipelines are monitored 24 hours a day via manned control centers. Trans-Union Interstate Pipeline, L.P. also utilizes aerial surveillance and/or on-ground observers to identify potential dangers. Control center personnel continually monitor the pipeline system and assess changes in pressure and flow. They notify field personnel if there is a possibility of a leak. Valves are utilized to isolate a leak.

Gas transmission and hazardous liquid pipeline operators have developed supplemental hazard and assessment programs, as well as a Public Awareness Program (PAPs). Specific information
