

**ABOUT CENTERPOINT ENERGY**

CenterPoint Energy’s natural gas distribution and transmission businesses have been serving customers for more than a century. We deliver more than 400 billion cubic feet of natural gas each year to about 3.2 million residential, commercial and industrial customers. This makes CenterPoint Energy one of the largest publicly traded companies in the country.

We own and operate about 118,000 miles of main and service lines that deliver gas to more than 990 communities in Arkansas, Louisiana, Minnesota, Mississippi, Oklahoma, and Texas including the high growth areas of Houston and Minneapolis.

In the state of Louisiana, we own and operate about 7,500 miles of Natural Gas Distribution main lines that service approximately 250,000 customers.

**COMMITMENT TO SAFETY, HEALTH & ENVIRONMENT**

According to the National Transportation and Safety Board, pipelines are the safest and most economical way to transport products. We are committed to the safe operation of our pipelines in your community. Our pipelines are designed, installed, tested, operated and maintained in accordance with all applicable federal and state requirements. CenterPoint Energy maintains its safety record with routine inspections, corrosion protection, maintenance and testing programs, employee training, integrity management programs, and a public awareness program.

If a gas pipeline emergency were to occur, CenterPoint Energy personnel will work directly with local emergency responders. Our priorities at the scene of a pipeline emergency are the same as yours - protect people, property and the environment. CenterPoint Energy field personnel are trained in Incident Command Structure (ICS) and familiar with how to work with local responders within the ICS framework. CenterPoint

Energy personnel will restrict the flow of gas and implement other operating actions as needed to minimize the impact of the emergency.

CenterPoint has committed the necessary resources to fully prepare and implement its emergency response plans and has obtained through contract the necessary private personnel and equipment to respond to the maximum extent practicable, to a “worst case” discharge or substantial threat of such a discharge.

Public safety officials and other Non-company personnel should not attempt to operate pipeline valves. Improper operation of pipeline valves can cause other accidents to occur.

To view and download maps of transmission pipelines in your county, see the National Pipeline Mapping System website [www.npms.phmsa.dot.gov](http://www.npms.phmsa.dot.gov), an online mapping program managed by the federal government.

Pipeline markers are placed along the pipeline route to indicate the approximate location of the line and to identify where the pipeline intersects with a street, highway, railway or river. Markers display the material transported in the line, the name of the pipeline operator and an emergency telephone number.

Integrity Management Programs have been implemented for areas designated as “high consequence areas” in accordance with federal regulations.

**EMERGENCY CONTACT:**

North Louisiana 1-866-275-5252  
South Louisiana 1-800-477-0177

**PRODUCTS/DOT GUIDEBOOK ID#/GUIDE#:**

Natural Gas 1971 115

**LOUISIANA PARISHES OF OPERATION:**
