

ABOUT EMPIRE PIPELINE LLC

Empire Pipeline LLC (Empire), headquartered in New Orleans, LA, USA, is a crude oil pipeline operator with gathering systems spanning over 50 miles in south-east Louisiana state waters and the Gulf of Mexico OCS federal lease waters.

Empire’s contractors and its pipeline system and facilities are located throughout Louisiana, USA.

WHAT DOES EMPIRE PIPELINE CORPORATION DO IF A LEAK OCCURS?

To prepare for the event of a leak, pipeline companies regularly communicate, plan and train with local emergency responders. Upon the notification of an incident or leak the pipeline company will immediately dispatch trained personnel to assist emergency responders.

Pipeline operators and emergency responders are trained to protect life, property and facilities in the case of an emergency.

Pipeline operators will also take steps to minimize the amount of product that leaks out and to isolate the pipeline emergency.

MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

Empire invests significant time maintaining the quality and integrity of their pipeline systems. Most active pipelines are monitored via SCADA remote monitoring. Empire also utilizes aerial surveillance and/or on-ground observers to identify potential dangers. Pipeline technicians monitor the pipeline system and assess changes in pressure and flow. They notify field personnel if there is a possibility of a leak. Automatic
