

**COMPANY INFORMATION, ASSETS & PRODUCTS TRANSPORTED**

Enterprise Products Partners L.P. is a leading North American provider of mid-stream energy services to producers and consumers of natural gas, Natural Gas Liquids (NGL), crude oil, refined products and petrochemicals. Enterprise transports natural gas, NGLs, petrochemicals and crude oil through a network of pipelines throughout the United States.

In Louisiana, Enterprise consists of the Enterprise Products Operating Liquid and Gas systems. The Liquids system includes all liquid assets operating in Louisiana as well as the TE Products System. The Gas system consists of assets within the Stateline Gathering System.

The Enterprise Products Operating Liquids system operates approximately 2,000 miles of pipelines throughout the southern part of Louisiana ranging in diameter from 3 inches to 20 inches.

The TE Products system operates approximately 434 miles of pipeline ranging in diameter from 4 inches to 20 inches. The products transported through this system include Iso-Butane, N-Butane, Diesel, Gasoline, Jet Fuel, Naphthalene, Natural Gasoline, Propane and Raffinate and conventional products.

The Enterprise Products Operating Gas system operates approximately 200 miles of pipelines in the northern part of Louisiana. This system is also known as the Stateline Gathering system. The

diameter of this pipeline ranges from 6 to 20 inches.

Enterprise Products also operates approximately 161 miles of the Tri-States Pipeline across the gulf coast. It ranges in diameter from 12" to 16" and transports mixed NGLs from Mobile Bay, Alabama to points near Kenner, Louisiana.

The BTA Gas Gathering system consists of approximately 550 miles of pipe in Texas and Louisiana. In Louisiana, this system transports approximately 3 mmcf of natural gas from Greenwood-Longwood area to Waskom ranging in diameter from 2" to 8".

**LOCATING ENTERPRISE PIPELINES – PIPELINE VIEWER TOOL**

To find specific information regarding location, size and products transported in our pipelines within one (1) mile of a specific address, visit our website at: [www.enterpriseproducts.com/pipeline-safety/pipeline-viewer](http://www.enterpriseproducts.com/pipeline-safety/pipeline-viewer). Please note the asset map and pipeline viewer tool are for informational purposes only.

**EMERGENCY RESPONSE PLAN**

An Emergency Response Plan (ERP) is developed for each pipeline facility to contain, control and mitigate the various types of emergency conditions/situations that could occur at one of our facilities. For more information regarding our emergency response plans and procedures, contact us at [publicawareness@eprod.com](mailto:publicawareness@eprod.com).

**EMERGENCY RESPONSE CAPABILITIES**

The Company's qualified personnel are trained in safe operations and emergency response activities and participate in exercises reflecting various types of emergency scenarios and environmental sensitivities. The Company utilizes the First Responder/Emergency Response Team concept to handle emergency incidents at its facilities. Employees receive hands on training in fire fighting, hazardous material spill response and rescue/medical/first aid training. In addition, we maintain

*Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.*

a well trained team of employees from various Company locations as members of the Corporate Emergency Organization. This team, as well as an array of emergency response equipment (includ-

ing, but not limited to, cell phones, fire extinguisher, supplied breathing air, and air monitoring equipment), can be mobilized and deployed to assist in handling emergency situations that may occur at a Company facility or pipeline location.

Enterprise Products utilizes its 24-hour/365 day a year, Pipeline Operations Control Center (888-883-6308) as a hub of communications in emergency response situations. Our manned control center monitors the flow, pressure, temperatures, and other conditions throughout the pipeline systems and is an integral part of our communication during emergency situations.

### ENTERPRISE PRODUCTS' RESPONSE IN AN EMERGENCY

- We will immediately dispatch personnel to help handle the emergency at the site.
- We will provide information to public safety officials to aid in their response to the emergency.
- We will take necessary operating actions such as closing and opening valves to minimize the impact of the leak.
- Public safety personnel and others unfamiliar with the pipeline should not attempt to operate any of the valves on the pipeline, unless instructed to do so

by Enterprise Products personnel. Improper operation of the pipeline valves could make the situation worse and cause other accidents to happen.

### INCIDENT COMMAND SYSTEM

Enterprise Products utilizes an expandable Incident Command System. Depending upon the size and complexity of an incident, additional Company or contract personnel may be added as needed. Additional federal, state or local agencies may be integrated into the Incident Command System by utilizing a Unified Command Structure.

### CONTACTS

#### Enterprise Products Operating LLC (Liquids)

Mark Dickey  
47433 Texaco Road  
Sorrento, LA 70778  
Phone: 225-675-2510  
Email: mwickey@eprod.com  
Parishes of responsibility: Acadia, Ascension, Assumption, Calcasieu, Cameron, Iberia, Iberville, Jefferson, Jefferson Davis, Lafayette, Lafourche, Livingston, Plaquemines, Pointe Coupee, St. Charles, St. Bernard, St. Helena, St. James, St. John the Baptist, St. Landry, St. Martin, St. Mary, St. Tammany, Terrebonne, Vermilion

### SPILL RESPONSE EQUIPMENT CAPABILITIES

We maintain emergency response equipment at some of our facilities. We also have agreements with various oil spill response organizations to provide the appropriate level of response with spill response equipment including trailers containing spill booms, sorbent materials, boats, motors, hand tools, power tools, pumps, hoses, personal protective equipment, first aid and miscellaneous supplies. These companies also have expert personnel trained in emergency response and cleanup methods.
