Maurepas Pipeline consists of three 35 mile pipelines owned and operated by Rose Rock Midstream, L.P. Rose Rock gathers, transports and stores crude oil, olefins, vacuum gas oil and condensates from independent producers and operators as well as aggregators and independent refiners. Rose Rock Midstream's operations are located Tulsa, Oklahoma. The products are transported via tank trucks and pipelines to third party pipelines, railcars and to the Cushing, Oklahoma Interchange. Rose Rock Midstream is headquartered in Tulsa, Oklahoma. It has District offices located in Oklahoma City and Cushing, Oklahoma, Williston, North Dakota, Stafford, Kansas, LaPlace, Louisiana and Hudson, Colorado.

COMMITMENT TO SAFETY, HEALTH & ENVIRONMENT

In all aspects of our business and operations, Rose Rock strives for the highest level of performance in regards to environmental, health and safety. This corporate responsibility is a reflection of our core values and commitments to "Drive Success" in our business. Rose Rock is committed to conducting business in a socially responsible and ethical manner with all stakeholders.

Rose Rock invests significant time and capital maintaining the quality and integrity of our pipeline system. The pipeline is monitored 24 hours a day via a manned Control Center in Tulsa, Oklahoma. Aerial surveillance is also used to monitor the condition of the pipeline right of way and identify potential encroachments or risks to our pipeline system. The Control Center personnel continuously monitor the pipeline system and assess changes in pressure and flow. Field personnel are dispatched by the Control Center whenever operational changes warrant a visual response to the change.

EMERGENCY PREPAREDNESS

Rose Rock personnel regularly communicates, plans and trains with local emergency responders simulating pipeline emergencies.

This training prepares our emergency responders in effectively responding to a pipeline emergency.

Upon notification of an incident or leak, Rose Rock immediately dispatches trained personnel to assist emergency responders.

Rose Rock personnel and emergency responders are trained to protect life, property and facilities. Responders are trained to take immediate step to minimize impact to public safety and to the environment. Contact Rose Rock Midstream directly for information regarding our Emergency Response Plans.

INTEGRITY MANAGEMENT

In accordance with federal regulatory requirements, Rose Rock Midstream, L.P. has developed a hazard and assessment program known as an Integrity Management Program (IMP). This program focuses on the identification and mitigation of hazards and risks to the pipeline system. Specific information about Rose Rock's IMP may be obtained by contacting our Risk Manager, Mr. Jim Ponder, at 405-945-6337 or at jponder@semgroupcorp.com.

LOUISIANA PARISHES OF OPERATION:

Ascension	St. James
St. John the Baptist	St. Charles

Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.

CALL BEFORE YOU DIG!

Louisiana 811 is a state governed One-Call safe digging program. 811 is to be utilized any time work requires digging. All One-Call State Agencies utilize the 811 call number which is accessible from anywhere in the United States. One easy call to 811 starts the One-Call ticket process to have any underground pipelines or utilities marked for free by anyone with underground facilities within your dig zone. Once the underground utilities have been contacted and the lines marked, you will be able to dig safely in your dig zone. For more information, see <http://call811.com>.

NATIONAL PIPELINE MAPPING SYSTEM

The U.S DOT, Office of Pipeline Safety, has created a web-based pipeline mapping system which may be accessed to identify pipeline operators in your locality. Information also includes the product, the Pipeline Operator contact information and any accidents or leaks which may have occurred in your area. NPMS is an excellent tool for the general public to know the pipelines in their vicinity.
