ABOUT MORROW RENEWABLES, LLC

Morrow Renewables, LLC (Morrow Renewables), located in Midland, TX., operates a jurisdictional natural gas transmission pipeline in Louisiana. The Morrow pipeline system is identified as: JDP Renewables, near Welsh, in Jefferson Davis Parish, Louisiana.

WHAT DOES MORROW RENEWABLES DO IF A LEAK OCCURS?

To prepare for the event of a leak, pipeline companies regularly communicate, plan and train with local emergency providers. Upon the notification of an incident or leak, Morrow Renewables will immediately dispatch trained personnel to assist emergency responders.

The pipeline operator and emergency responders are trained to protect life, property and facilities in case of an emergency.

Morrow will also take steps to minimize the amount of product that leaks out and to isolate the pipeline emergency.

MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

Morrow Renewables invests significant time and capital maintaining the quality and integrity of their pipeline systems.

Operator personnel continually monitor the pipeline system and assess changes in pressure and flow. We notify field personnel if there is a possibility of a leak.

Specific information about our emergency response program and operations may be obtained by contacting us directly.

PRODUCTS TRANSPORTED

Product: Natural Gas

Leak Type: Gas

Vapors:

Lighter than air and will generally rise and dissipate. May gather in a confined space and travel to a source of ignition.

Product Hazards:

Will be easily ignited by heat, sparks or flames and will form explosive mixtures with air. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at high concentrations.
