ABOUT NGL SUPPLY TERMINAL COMPANY, LLC (NGL)

NGL Energy Partners LP is a diversified midstream MLP that provides multiple services to producers and end-users, including transportation, storage, blending and marketing of crude oil, NGLs, refined products / renewables, and water solutions. NGL Energy Partners acquired the 225-mile natural gas liquids pipeline from Lambda Energy Resources that spans from Kalkaska, MI to Marysville, MI. The pipeline, named the Ambassador Pipeline, is eight inches in diameter and will transport LPG across ten (10) counties in the State of Michigan. Those counties are: Kalkaska, Missaukee, Clare, Isabella, Midland, Gratiot, Saginaw, Genesee, Lapeer, and St. Clair.

DAMAGE PREVENTION - CALL BEFORE YOU DIG. IT'S FREE, AND IT'S THE LAW!

Building a fence? Planning landscape work? Installing field tile? Most pipeline accidents occur when individuals are not aware of a pipeline's location before they begin excavation. You can help prevent pipeline incidents by contacting your state one call agency before you dig. One easy phone call to 811 starts the process, and it's FREE. Once your underground lines have been marked for your project, you will know the approximate location of your pipelines and utility lines. For more information regarding 811 please visit <http://www.call811.com>.

WHAT DOES NGL DO IF A PIPELINE EMERGENCY OCCURS?

To prepare for a pipeline emergency, NGL regularly communicates emergency plans and completes training initiatives with local emergency responders. Upon the notification of an incident, trained personnel are dispatched to assist emergency responders. NGL personnel and emergency responders are trained to protect life first, then property in case of an emergency. NGL will focus on contacting emergency response personnel, evacuating affected public and personnel, and isolating the affected pipeline segment.

MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

NGL invests significant time and capital maintaining the quality and integrity of their pipeline systems. Pipeline pressure and flow is measured by monitoring systems 24 hours a day. Aerial patrols are conducted to assist local personnel in identifying potential dangers. Any conditions that could indicate a leak or system malfunction are relayed to personnel who are trained to investigate, and if appropriate, initiate emergency shutdown procedures.

OUR COMMITMENT TO SAFETY

Our highest priority is public safety and protecting the environment. NGL places emphasis on establishing, and exceeding safety standards. All assets must be operated in a safe, efficient and

environmentally responsible manner. We proactively develop and implement risk management, hazard assessment, prevention and emergency response programs. We work closely with local emergency response personnel and maintain ongoing dialogue within the communities where we operate. This corporate responsibility is a reflection of our core value to conduct business in a socially responsible and ethical manner.

PIPELINE MARKERS

Pipeline Markers are in pipeline rights-of-way and indicate the approximate location of the pipeline, not the depth of the pipeline. On these markers you will find the operator name, emergency phone number, and the product being transported.
