VCP Michigan, LLC
720 South Otsego Ave.
Gaylord, MI 49735

WHO IS VCP MICHIGAN, LLC

VCP Michigan, LLC (VCP Michigan), headquartered in Gaylord, Michigan, is a natural gas gathering system spanning approximately 14 miles in Otsego and Montmorency counties in Michigan.

More information on VCP Michigan can be found by contacting us directly.

MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

VCP Michigan invests significant time and capital maintaining the quality and integrity of their pipeline systems. All active pipelines are monitored 24 hours a day via automated / manned answering service centers. VCP Michigan also utilizes on-ground observers during scheduled work hours to identify potential dangers. Answering service center personnel continually monitor the automated alarmed pipeline system and call VCP personnel if needed. They notify field personnel if there is a possibility of a leak. Trained VCP employees will respond to isolate a leak and work with emergency personnel to make the situation as safe as possible.

If you observe any unusual or suspicious activity near our pipeline facilities or in the unlikely event an emergency occurs, please call us at any time using one of the numbers listed in this document.

ALWAYS CALL 811 BEFORE YOU DIG!

WHAT ARE THE SIGNS OF A NATURAL GAS PIPELINE LEAK?

- Blowing or hissing sound
- Dust blowing from a hole in the ground
- Continuous bubbling in wet or flooded areas
- Gaseous or hydrocarbon odor
- Dead or discolored vegetation in a green area
- Flames, if a leak has ignited

WHAT SHOULD I DO IF I SUSPECT A PIPELINE LEAK?

Your personal safety should be your first concern:

- Evacuate the area and prevent anyone from entering
- Abandon any equipment being used near the area
- Avoid any open flames
- Avoid introducing any sources of ignition to the area (such as cell phones, pagers, 2-way radios)
- Do not start/turn off motor vehicles/ electrical equipment
- Call 911 or contact local fire or law enforcement
- Notify the pipeline company
- Do not attempt to extinguish a natural gas fire
- Do not attempt to operate any pipeline valves

PIPELINE LOCATION AND MARKERS

Pipeline markers are used to indicate the approximate location of a natural gas pipeline and to provide contact information. Markers should never be removed or relocated by anyone other than a pipeline operator.

You can also find out where other companies' pipelines are in your area by going to the National Pipeline Mapping System website at www.npms.phmsa.dot.gov.

MICHIGAN COUNTIES OF OPERATION:

Montmorency	Otsego
-------------	--------

Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.

PRODUCTS TRANSPORTED

Product: Natural Gas

Leak Type: Gas

Vapors: Lighter than air and will generally rise and dissipate. May gather in a confined space and travel to a source of ignition.

Health Hazards: Will be easily ignited by heat, sparks or flames and will form explosive mixtures with air. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at high concentrations. Contact with gas or liquefied gas may cause burns, severe injury and/or frostbite.

EMERGENCY RESPONSE PLANS

An Emergency Response Plan is developed for each pipeline facility to contain, control and mitigate the various types of emergency conditions/situations that could occur at one of our facilities. For more information regarding VCP Michigan's emergency response plans and procedures, contact:
