ABOUT WBI ENERGY TRANSMISSION

WBI Energy Transmission operates a 16” steel natural gas pipeline from our existing facilities near Mapleton ND to an interconnect with Viking Gas Transmission Company near Felton MN. As a safety precaution, the natural gas is odorized as it enters our system. The maximum operating pressure of our pipeline is 1480 psi. Our gas control center monitors the system 24 hours a day and can be reached at 1-888-859-7291.

COMMITMENT TO SAFETY, HEALTH & ENVIRONMENT

Unfortunately, some emergencies do not exhibit warnings of imminent failure while others develop because the warnings were not recognized. We must therefore be prepared to respond effectively when an emergency develops. The key to effective emergency management and response preparedness is clear, concise communication and effective cooperation. When you call the 24-hour emergency

phone number located on our marker signs or as listed in this document, you will speak with someone at our gas control center. The control center is the heart of the pipeline operations, where information about the pipeline and operating equipment is constantly monitored. As an emergency responder, you can help control the incident by being prepared to communicate as much information as possible to the control center about the current incident situation. Every incident is different - each will have special
