Liberty Utilities is a value-driven company. Our brand values shape our corporate culture and unite our national, collective efforts to deliver quality water, gas and electric distribution services to small and mid-sized communities across the United States.

With more than 750,000 customers, Liberty Utilities is committed to local decision making that directly meets the needs of its customers. This means providing walk in customer service centers, creating jobs, and providing responsive and reliable service. As a company, Liberty Utilities promotes local conservation and energy efficiency initiatives and programs for businesses and residential customers, including the low-income sector. The company measures its performance on customer experience, public and workplace safety, and service reliability. Liberty Utilities currently operates in Arizona, Arkansas, California, Georgia, Illinois, Iowa, Kansas, Massachusetts, Missouri, New Hampshire, Oklahoma, and Texas.

**COMMITMENT TO SAFETY, HEALTH & ENVIRONMENT**

Safety is a main concern of Liberty Utilities. We believe that nothing can justify endangering our customers, our communities or our employees. Safety at Liberty Utilities is the responsibility of every employee regardless of his or her position. Liberty Utilities is committed to:

- Providing a safe, healthy and stable work environment for all employees
- Delivering safe, reliable and efficient service to its customers
- Enhancing general public safety through safe work practices and public education
- Complying with federal, state and local regulations as they pertain to Liberty Utilities' daily operations
