Frontier Field Services is a wholly owned subsidiary of Aka Energy, a Southern Ute Indian Tribe Growth Fund Company. Frontier was founded in 2002 and is headquartered in Tulsa, Oklahoma.

The combined Frontier assets include over 400 MMcfd of gas gathering, treating and processing facilities including 700 miles of pipeline and related facilities located in three states (New Mexico, Texas and Oklahoma). These assets include:

- Maljamar - 60 MMcfd cryogenic gas plant and related gathering system located in Eddy, Lea, and Chaves Counties of southeast New Mexico.
- Empire Abo - 56 MMcfd cryogenic gas plant and gathering system located in Eddy County, New Mexico.
- Kelton Gas Services - 50 MMcfd cryogenic gas plant and gathering system located in Wheeler County, Texas.
- San Bois Treating Facility - 250 MMcfd amine treating and dehydration facility located in Latimer County, Oklahoma.

**What are the signs of a Natural Gas Pipeline Leak?**

- Blowing or hissing sound
- Dust blowing from a hole in the ground
- Continuous bubbling in wet or flooded areas
- Gaseous or hydrocarbon odor
- Dead or discolored vegetation in a green area
- Flames, if a leak has ignited

**What Should I Do If I Suspect a Pipeline Leak?**

Your personal safety should be your first concern:

- Evacuate the area and prevent anyone from entering
- Abandon any equipment being used near the area
- Avoid any open flames

- Avoid introducing any sources of ignition to the area (such as cell phones, pagers, 2-way radios)
- Do not start/turn off motor vehicles/ electrical equipment
- Call 911 or contact local fire or law enforcement
- Notify the pipeline company
- Do not attempt to extinguish a natural gas fire
- Do not attempt to operate any pipeline valves

**Pipeline Safety**

System failures occur infrequently along the nation's network of interstate natural gas pipeline facilities, and many of these are caused by damage from others digging near the pipeline. We watch for unauthorized digging, but we request your help too.

We participate in One-Call Centers and strongly encourage those who are going to dig to call their state One-Call Center or the 811 "Call before you dig" hotline to allow pipeline companies and owners of other buried utilities a chance to mark the underground facilities in the area before digging begins.

**Pipeline Location and Markers**

Pipeline markers are used to indicate the approximate location of a natural gas pipeline and to provide contact information. Aerial patrol planes also use the markers to identify the pipeline route. Markers should never be removed or relocated by anyone other than a pipeline operator.

To find out where Frontier Field Services pipelines are located in your area, visit our website at [www.frontierfieldservices.com](http://www.frontierfieldservices.com) – OR – contact a Frontier Field
