

## OPERATOR OVERVIEW

Kimble Company operates and maintains natural gas gathering pipelines located in Coshocton, Guernsey, Harrison and Tuscarawas counties in Ohio. The pipelines are segmented in each county and in total are 52.837 miles long. You are receiving this safety information because you live, work or are a first responder near the pipeline. Please take a moment to review this information and keep it handy in case you need to reach out to Kimble Company.

## ABOUT NATURAL GAS

Natural Gas is lighter than air and will generally rise and dissipate. It may gather in a confined space and travel to a source of ignition. Natural Gas is easily ignited by heat, sparks or flames and will form explosive mixtures with air. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at high concentrations. Contact with gas or liquified gas may cause burns, severe injury and/or frost bite.

## DAMAGE PREVENTION

Most pipeline accidents occur when individuals are not aware of a pipeline's location before they begin excavation. You can help prevent pipeline incidents by contacting your state one call agency before you dig. One easy phone call to 811 gets the approximate location of underground utility lines marked for free. For more information go to: [www.call811.com](http://www.call811.com).

## PIPELINE LOCATION INFORMATION

Pipeline markers are in pipeline rights-of-way and indicate the approximate location of the pipeline but not the depth of the pipeline. On these markers you will find the operator's name, emergency phone number and the product being transported in the pipeline.

## LEAK RECOGNITION AND RESPONSE

### Possible signs of a leak:

- Dead vegetation
- Bubbling or hissing sound
- Unusual smell

### Response to a leak:

- Leave the leak area immediately.
- Do not touch, breathe, or come in contact with the product.
- Do not light a match, start an engine, use a telephone, switch on/off light switches or do anything that may cause a spark in the area or vicinity of the leak.
- From a safe location immediately call 911 and Kimble Company at 800-201-0005 and report exactly what you have seen, heard, or smelled and where this incident or event took place.
- Warn others but do so without entering or re-entering the area where a pipeline leak is suspected.

*Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.*

## NATIONAL PIPELINE MAPPING SYSTEM

Kimble Company does not operate any transmission pipelines. To view and download transmission pipelines in your county, visit the National Pipeline Mapping System at: <https://www.npms.phmsa.dot.gov/>. This online platform is used by the general public, government officials, emergency officials and pipeline operators for a variety of tasks including emergency response planning, smart growth planning, critical infrastructure protection, and environmental protection.

## PREVENTION MEASURES UNDERTAKEN

Kimble Company invests significant time and capital maintaining the quality and integrity of its pipeline systems. Kimble Company utilizes on-ground observers to identify potential dangers. Personnel monitor the pipeline system and assess changes in pressure and flow. They notify field personnel if there is a possibility of a leak.

## EMERGENCY PREPAREDNESS

Kimble Company regularly communicates with the proper Emergency and Public officials to ensure that in the event of an emergency the proper steps are taken.

If you are an agency that would like more information about this or to get a copy of the company's Emergency Response Plan, please contact [RHDKEngineering@kimblecompanies.com](mailto:RHDKEngineering@kimblecompanies.com).
