

ABOUT RICHLAND STRYKER GENERATION, LLC

Richland Stryker Generation, LLC (RSG), located in Defiance, Ohio, is a publically traded power generation company. This facility generates electricity that serves customers throughout the Eastern United States.

WHAT DOES RSG DO IF A LEAK OCCURS?

To prepare for the event of a leak, pipeline companies regularly communicate, plan and train with local emergency responders. Upon the notification of an incident or leak, the pipeline company will immediately dispatch trained personnel to assist emergency responders. Pipeline operators and emergency responders are trained to protect life, property and facilities in the case of an emergency. Pipeline operators will also take steps to minimize the amount of product that leaks out and to isolate the pipeline emergency.

We ask for your help in identifying possible gas leaks and reporting any activity on or near our rights-of-way which might cause damage to our pipeline.

Additionally, we will:

1. Shut down the pipeline and isolate the problem
2. Identify hazards
3. Excavate and repair the damaged pipeline

MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

RSG invests significant time and capital maintaining the quality and integrity of their pipeline systems. RSG utilizes on-ground observers to identify potential dangers. The pipeline supplier PEPL continually monitors the pipeline system and assesses changes in pressure and flow. They notify field personnel if there is a possibility of a leak. Automatic shut-off valves are sometimes utilized to isolate a leak. Gas transmission and hazardous liquid pipeline operators have developed supplemental hazard and assessment programs known as Integrity Management Programs (IMPs).

EMERGENCY CONTACT:

PRODUCTS/DOT GUIDEBOOK ID#/GUIDE#:

Natural Gas 1971 115

OHIO COUNTIES OF OPERATION:

Defiance

Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.

Specific information about RSG's program may be found by contacting us directly.

HOW TO GET ADDITIONAL INFORMATION

For an overview of RSG's IMP, contact UTI Corp. at (614) 482-8080.

PRODUCTS TRANSPORTED

PRODUCT	LEAK TYPE	VAPORS
NATURAL GAS	Gas	Lighter than air and will generally rise and dissipate. May gather in a confined space and travel to a source of ignition.
HEALTH HAZARDS		Will be easily ignited by heat, sparks or flames and will form explosive mixtures with air. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at high concentrations. Contact with gas or liquefied gas may cause burns, severe injury and/or frostbite.
