WHO IS UTILITY PIPELINE?

Utility Pipeline, Ltd. is located in Canton, Ohio and is a natural gas distribution management company. UPL owns and operates both natural gas distribution, gathering and transmission systems.

In the State of Ohio, we own and operate four public gas utilities. We operate under contract, three natural gas cooperatives and one municipality. These systems are in 59 counties and represent approximately 2,000 miles of main line and approximately 44,000 residential, commercial and industrial customers.

In the State of Pennsylvania, we operate under contract, two natural gas cooperatives. These systems are in 11 counties and represent approximately 315 miles of main line and approximately 6,300 residential, commercial and industrial customers.

Operating Systems:

Eastern Natural Gas
Keystone Cooperative
KNG Energy
Knox Energy Cooperative
Madison Energy Cooperative
Pike Natural Gas
Northern Industrial Energy Development
Village of Verona
Village Energy Cooperative

WHAT ARE THE SIGNS OF A NATURAL GAS PIPELINE LEAK?

- Blowing or hissing sound
- Dust blowing from a hole in the ground
- Continuous bubbling in wet or flooded areas
- Gaseous or hydrocarbon odor
- Dead or discolored vegetation in a green area
- Flames, if a leak has ignited

WHAT SHOULD I DO IF I SUSPECT A PIPELINE LEAK?

Your personal safety should be your first concern:

- Evacuate the area and prevent anyone from entering

- Abandon any equipment being used near the area
- Avoid any open flames
- Avoid introducing any sources of ignition to the area (such as cell phones, pagers, 2-way radios)
- Do not start/turn off motor vehicles/ electrical equipment
- Call 911 or contact local fire or law enforcement
- Notify the pipeline company
- Do not attempt to extinguish a natural gas fire
- Do not attempt to operate any pipeline valves

PIPELINE SAFETY

System failures occur infrequently along the nation's network of interstate natural gas pipeline facilities, and many of these are caused by damage from others digging near the pipeline. We watch for unauthorized digging, but we request your help to notify us.

ALWAYS CALL 811 BEFORE YOU DIG!

PIPELINE LOCATION AND MARKERS

Pipeline markers are used to indicate the approximate location of a natural gas pipeline and to provide contact information. Aerial patrol planes also use the markers to identify the pipeline route. Markers should never be removed or relocated by anyone other than a pipeline operator.

You can also find out where other companies' pipelines are in your area by going to the National Pipeline Mapping System website at www.npms.phmsa.dot.gov.
