ABOUT SHORE TERMINALS LLC

Shore Terminals LLC is a subsidiary of NuStar Energy L.P. (NuStar), which is a publicly traded, limited partnership based in San Antonio, Texas. Shore Terminals LLC operates a petroleum bulk storage facility and associated short pipelines in Portland, Oregon.

NuStar Energy is committed to ensuring that we do our part to store the products that a changing market requires. In partnership with our stakeholders, by the end of 2016 NuStar Energy in Portland will have increased its clean fuels storage to over 14 million gallons.

You may be aware of Sunoco LP's recent acquisition of NuStar Energy L.P. through an all-stock purchase. All NuStar operating companies, including Shore Terminals LLC, still own and operate the same assets as before the transaction. In other words, no asset transfer or change of operational control has occurred. For the sake of clarity, this information only references NuStar; however, our communications going forward will be on Sunoco letterhead and from the Sunoco.com email domain.

NuStar has comprehensive Public Awareness and Damage Prevention Programs in place. The goal of each Program is to enhance safety and environmental protection through increased public awareness and knowledge. Public awareness programs should raise the awareness of the affected public and key stakeholder audiences of the presence of pipelines in their communities and increase their understanding of the role of pipelines in transporting energy.

Please read and keep these important safety messages located in the brochure and company profile provided in the event you need to reference them in the future.

Contact us for more information about our Integrity Management Program or Emergency Response Plan.

WHAT DOES NUSTAR DO IF A LEAK OCCURS?

To prepare for the event of a leak, pipeline companies regularly communicate, plan and train with local emergency responders. Upon the notification of an incident or leak the pipeline company will immediately dispatch trained personnel to assist emergency responders.

Pipeline operators and emergency responders are trained to protect life, property and facilities in the case of an emergency.

Pipeline operators will also take steps to minimize the amount of product that leaks out and to isolate the pipeline emergency.

MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

Safety and environmental performance is NuStar's first priority. Ensuring the mechanical integrity of our pipelines helps us to successfully meet our goal of protecting employees, customers, contractors, and the public and environment. The NuStar Pipeline Integrity Management Program defines how we work to achieve this goal and comply with applicable laws and regulations.

The NuStar Pipeline Integrity Management Program assists us in preventing leaks and spills, determining pipelines that could affect High Consequence Areas (HCA's), and identifying evaluation and improvement opportunities.

PRODUCTS/DOT GUIDEBOOK ID#/GUIDE#:

Bio-Fuel	1202	128
Diesel Fuel	1202	128
Ethanol	1170	127
Gasoline	1203	128

OREGON

COUNTIES OF OPERATION:

Multnomah

Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.

PRODUCTS TRANSPORTED

Product: Hazardous Liquids [such as: Diesel Fuel, Gasoline, and other clean fuels such as Ethanol, Bio-Fuel and renewable diesel]

Leak Type: Liquid

Vapors: Initially heavier than air and spread along ground and collect in low or confined areas. Vapors may travel to source of ignition and flash back. Explosion hazards indoors, outdoors or in sewers.

Health Hazards: Inhalation or contact with material may irritate or burn skin and eyes. Fire may produce irritating, corrosive and/or toxic gases. Vapors may cause dizziness or suffocation. Runoff from fire control or dilution water may cause pollution.

SEE SOMETHING, SAY SOMETHING

As a neighbor, you play a key role in helping us keep our pipeline system safe, secure, and reliable. By reporting potential issues early, you can help prevent pipeline emergencies. If you see suspicious or unusual activity near pipeline operations such as loitering people or vehicles, unauthorized activities or digging, please call us immediately at 800-255-6045. In case of emergency or threat always call 911 prior to contacting us.
