**ABOUT CARDINAL MIDSTREAM III, LLC**

Cardinal Midstream III, LLC (Cardinal), owner of Cardinal NE Midstream, LLC operates about 4 miles of natural gas transmission pipelines in Pennsylvania.

Cardinal strives to maintain the integrity of our pipeline systems and is committed to safety and dedicated to educating communities on pipelines and how to avoid pipeline accidents. Though we electronically monitor our assets around the clock, regularly patrol our pipeline system and have field personnel working and living in close proximity to our facilities, we also request your help to maintain a safe, secure, and reliable pipeline system.

**FACILITY LOCATION**

Cardinal NE Midstream, LLC operates a system consisting of approximately 4 miles of pipeline in Tioga County

In the unlikely event an emergency occurs, please call us at any time using one of the numbers listed in this document.

<b>PRODUCTS/DOT GUIDEBOOK ID#/GUIDE#:</b>		
Natural Gas	1971	115

**PENNSYLVANIA  
 COUNTIES OF OPERATION:**

Tioga

*Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.*

**WHAT ARE THE SIGNS OF A NATURAL GAS PIPELINE LEAK?**

- Blowing or hissing sound
- Dust blowing from a hole in the ground
- Continuous bubbling in wet or flooded areas
- Gaseous or hydrocarbon odor
- Dead or discolored vegetation in a green area
- Flames, if a leak has ignited

**WHAT SHOULD I DO IF I SUSPECT A PIPELINE LEAK?**

Your personal safety should be your first concern:

- Evacuate the area and prevent anyone from entering
- Abandon any equipment being used near the area
- Avoid any open flames
- Avoid introducing any sources of ignition to the area (such as cell phones, pagers, 2-way radios)
- Do not start/turn off motor vehicles/ electrical equipment
- Call 911 or contact local fire or law enforcement
- Notify the pipeline company
- Do not attempt to extinguish a natural gas fire
- Do not attempt to operate any pipeline valves

**PIPELINE SAFETY**

System failures occur infrequently along the nation’s network of interstate natural gas pipeline facilities, and many of these are caused by damage from others digging near the pipeline. We watch for unauthorized digging, but we request your help too.

We participate in One-Call Centers and strongly encourage those who are going to dig to call their state One-Call Center or the 811 “Call before you dig” hotline to allow pipeline companies and owners of other buried utilities a chance to mark the underground facilities in the area before digging begins.

**PIPELINE LOCATION AND MARKERS**

Pipeline markers are used to indicate the approximate location of a natural gas pipeline and to provide contact information. Markers should never be removed or relocated by anyone other than a pipeline operator.

You can also find out where other companies’ pipelines are in your area by going to the National Pipeline Mapping System website at [www.npms.phmsa.dot.gov](http://www.npms.phmsa.dot.gov).

**EMERGENCY RESPONSE PLANS**

An Emergency Response Plan is developed for each pipeline facility to contain, control and mitigate the various types of emergency conditions/situations that could occur at one of our facilities. For more information regarding Cardinal’s operations, contact us at:
