ABOUT UGI ENERGY SERVICES

UGI Energy Services, LLC owns approximately 15 BCF of underground natural gas storage in north-central Pennsylvania, operates peaking plants and propane terminals in Pennsylvania, markets LNG to mobile and stationary end users, and is developing midstream projects throughout the Marcellus Shale region. UGI Energy Services also markets natural gas, electricity and liquid fuels to approximately 18,000 commercial and industrial customers at approximately 43,000 locations in nine eastern states and Washington, D.C. and owns electric generation and LNG assets in Pennsylvania.

WHAT DOES UGI ENERGY SERVICES DO IF A LEAK OCCURS?

To prepare for the event of a leak, pipeline companies regularly communicate, plan and train with local emergency re-

sponders. Upon the notification of an incident or leak the pipeline company will immediately dispatch trained personnel to assist emergency responders.

Pipeline operators and emergency responders are trained to protect life, property and facilities in the case of an emergency. Pipeline operators will also take steps to minimize the amount of product that leaks out and to isolate the pipeline emergency.

MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

UGI Energy Services invests significant time and capital maintaining the quality and integrity of their pipeline systems. Most active pipelines are monitored 24 hours a day via manned control centers. UGI Energy Services also utilizes aerial surveillance and/or on ground observers to identify potential dangers. Control

Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.

center personnel continually monitor the pipeline system and assess changes in pressure and flow. They notify field personnel if there is a possibility of a leak. Automatic shut-off valves are sometimes utilized to isolate a leak.

Gas transmission and hazardous liquid pipeline operators have developed supplemental hazard and assessment programs known as Integrity Management Programs (IMPs). Specific information about UGI Energy Services's program may be found by contacting us directly.

HOW TO GET ADDITIONAL INFORMATION

For an overview of UGI Energy Services's IMP, contact us at 610-373-7999 Ext. 1243.

PRODUCTS TRANSPORTED IN YOUR AREA

PRODUCT	LEAK TYPE	VAPORS
NATURAL GAS	Gas	Lighter than air and will generally rise and dissipate. May gather in a confined space and travel to a source of ignition.
HEALTH HAZARDS	Will be easily ignited by heat, sparks or flames and will form explosive mixtures with air. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at high concentrations. Contact with gas or liquefied gas may cause burns, severe injury and/or frostbite.	
HAZARDOUS LIQUIDS [SUCH AS: CRUDE OIL, DIESEL FUEL, JET FUEL, GASOLINE, AND OTHER REFINED PRODUCTS]	Liquid	Initially heavier than air and spread along ground and collect in low or confined areas. Vapors may travel to source of ignition and flash back. Explosion hazards indoors, outdoors or in sewers.
HEALTH HAZARDS	Inhalation or contact with material may irritate or burn skin and eyes. Fire may produce irritating, corrosive and/or toxic gases. Vapors may cause dizziness or suffocation. Runoff from fire control or dilution water may cause pollution.
