ABOUT WCAA MIDSTREAM LLC

In January of 2025, CNX Resources Corporation (CNX) acquired the Apex Energy II, LLC natural gas pipeline system and now operates it under the name of WCAA Midstream LLC. With a history of energy leadership that stretches back more than 150 years, CNX Resources Corporation is a premiere independent oil and gas exploration and production company headquartered in Canonsburg, PA and with operations centered in the Appalachian Basin. With a spirit of innovation, we're pioneering a new tomorrow through technological advancements in shale gas exploration and production in the most prolific natural gas basin in the world.

WHAT DOES WCAA DO IF A LEAK OCCURS?

To prepare for the event of a leak, pipeline companies regularly communicate, plan and train with local emergency responders. Upon the notification of an incident or leak CNX Resources will immediately dispatch trained personnel to assist emergency responders.

Pipeline operators and emergency responders are trained to protect life, property and facilities in the case of an emergency. Pipeline operators will also take steps to minimize the amount of product leakage and to isolate the pipeline emergency.

MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

CNX Resources' Communications/Control Center operates 24-hours a day, seven days a week all throughout the year. We patrol our pipeline rights of way and conduct leak surveys on a regular basis. We conduct periodic inspections of our pipelines and our employees who perform safety sensitive functions receive updated training and are qualified in accordance with the US Department of Transportation regulations for natural gas pipeline operators.

PRODUCTS TRANSPORTED

Product: Natural Gas

Leak Type: Gas

Vapors: Lighter than air and will generally rise and dissipate. May gather in a confined space and travel to a source of ignition.

Health Hazards: Will be easily ignited by heat, sparks or flames and will form explosive mixtures with air. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at
