PUBLIC SAFETY & ENVIRONMENTAL HEALTH

Delek US and subsidiary companies operate our business in a manner that protects the environment and the health and safety of employees, customers, contractors and the public while complying with applicable laws, regulations and other requirements. We recognize that the safety and health of our employees and stewardship of the environment are the responsibility of every Delek US employee. We are dedicated to being a good neighbor in the communities where we operate.

We will conduct our operations safely and responsibly. Delek has invested hundreds of millions of dollars in projects at our refinery, terminals and retail stations to produce clean fuels, protect the environment and improve the safety of our employees and the public.

DAMAGE PREVENTION MEASURES

There are automatic shutdown valves along the various pipeline systems that are actuated by Nettleton, TX SCADA control. Additionally, there are numerous check valves and mainline block valves located along the line to further isolate strategic sections of the line. SCADA system monitors the East Texas Pipeline System.

OUR REACTIONS DURING AN INCIDENT

Operators in the Nettleton, TX will shut down and isolate the East Texas Pipeline System immediately upon any indication of abnormal activity or re-sponse on the system. Once an actual incident location has been determined (either by on-the-ground or air recon-naissance) trained Delek response personnel will be on sight in less than one hour, with response equipment. Emergency response contractors (SWS Environmental, Garner Environmental) and equipment will respond within two to three hours anywhere on the West Texas System.
