

**WHO IS FAIRWAY ENERGY**

Fairway Energy owns and operates two 24-inch crude oil pipelines located in Houston, South Houston, and Pasadena. The pipelines share a common right-of-way and travel approximately 18 miles between a manifold at Speed Junction and the Fairway Energy Pierce Junction storage facility located near the Wildcat golf course. Fairway Energy also operates an underground crude oil storage facility at Pierce Junction.

If you observe any unusual or suspicious activity near our pipeline facilities or in the unlikely event an emergency occurs, please call us at any time using one of the numbers listed in this document. More information on Fairway Energy Pipeline can be found at: [www.fairwaymidstream.com](http://www.fairwaymidstream.com).

**WHAT ARE THE SIGNS OF A CRUDE OIL PIPELINE LEAK?**

- Strange or unusual odor in the area of the pipeline
- Crude oil on the ground in the area of the pipeline
- Flames originating from an opening in the ground
- Sheen on standing water in the area of the pipeline

**WHAT SHOULD I DO IF I SUSPECT A PIPELINE LEAK?**

Your personal safety should be your first concern. If you suspect a pipeline leak, immediately evacuate the area.

- Evacuate the area and prevent anyone from entering
- Abandon any equipment being used near the area
- Avoid any open flames
- Do not attempt to extinguish any fires
- Avoid introducing any sources of ignition to the area (such as cell phones, pagers, 2-way radios)
- Do not start/turn off motor vehicles/ electrical equipment
- Call 911 or contact local fire or law enforcement
- Notify the pipeline company – call the emergency number on a nearby pipeline marker
- Do not attempt to operate any pipeline valves

**PIPELINE SAFETY**

System failures occur infrequently along the nation’s network of crude oil pipeline facilities and many of these are caused by damage from others digging near the pipeline. We watch for unauthorized digging, but we request your help to notify us.

ALWAYS CALL 811 BEFORE YOU DIG!

**PIPELINE LOCATION AND MARKERS**

Pipeline markers are used to indicate the approximate location of buried pipelines and to provide contact information. Aerial patrol planes also use the markers to identify the pipeline route. Markers should never be removed or relocated by anyone other than a pipeline operator.

You can also find out where other companies’ pipelines are in your area by going to the National Pipeline Mapping System website at [www.npms.phmsa.dot.gov](http://www.npms.phmsa.dot.gov).

**EMERGENCY RESPONSE PLANS**

Fairway Energy has an Emergency Response Plan developed specifically to contain, control and mitigate the types of situations possible when operating crude oil pipelines. For more information regarding Fairway Energy’s emergency response plans and procedures, contact us at [inquiries@fairwaymidstream.com](mailto:inquiries@fairwaymidstream.com).
