

ABOUT FIVE-J.A.B. INC.

Five-J.A.B., Inc. (5JAB) headquartered in Tomball Texas, is a production company gathering natural gas in Newton and Orange Counties, Texas.

WHAT DOES FIVE-J.A.B. DO IF A LEAK OCCURS?

To prepare for the event of a leak, pipeline companies regularly communicate, plan and train with local emergency responders. Upon the notification of an incident or leak the pipeline company will immediately dispatch trained personnel to assist emergency responders.

Pipeline operators and emergency responders are trained to protect life, property and facilities in the case of an emergency.

Pipeline operators will also take steps to minimize the amount of product that leaks out and to isolate the pipeline emergency. 5JAB personnel will restrict the flow of product and implement other

operating actions as needed to minimize the impact of the emergency. Public safety officials and other non-company personnel should not attempt to operate pipeline valves. Improper operation of pipeline valves can cause other accidents to occur.

MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

5JAB invests significant time and capital maintaining the quality and integrity of their pipeline systems. 5JAB also utilizes on-ground observers to identify potential dangers. Alarm systems continually monitor the pipeline system and assess changes in pressure and flow. They notify field personnel if there is a possibility change in operations of the pipelines.

Gas transmission pipeline operators have developed supplemental hazard and assessment programs known as Integrity Management Programs (IMPs). Specific information about 5JAB's program may be found by contacting us directly.

COUNTIES OF OPERATION:**

Newton Orange

Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.

PRODUCTS TRANSPORTED IN YOUR AREA

Product: Natural Gas
Leak Type: Gas

Vapors: Lighter than air and will generally rise and dissipate. May gather in a confined space and travel to a source of ignition.

Health Hazards: Will be easily ignited by heat, sparks or flames and will form explosive mixtures with air. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at high concentrations. Contact with gas or liquefied gas may cause burns, severe injury and/or frostbite.

HOW TO GET ADDITIONAL INFORMATION

For an overview of 5JAB's IMP, contact us at 281-356-7677.
