

Mission Valley Pipeline, LP

ABOUT MISSION VALLEY PIPELINE, LP

Mission Valley Pipeline, LP operates natural gas pipeline facilities in Texas. Mission Valley's goal is to safely and reliably deliver natural gas to its customers through the intrastate pipeline system.

WHAT DOES MISSION VALLEY PIPELINE, LP DO IF A LEAK OCCURS?

To prepare for the event of a leak, Mission Valley regularly communicates, plans and trains with local emergency responders. Upon the notification of an incident or leak Mission Valley will immediately dispatch trained personnel to assist emergency responders.

Mission Valley and emergency responders are trained to protect life, property and facilities in the case of an emergency.

Mission Valley will also take steps to minimize the amount of product that leaks out and to isolate the pipeline emergency.

PRODUCTS TRANSPORTED

Product: Natural Gas

Leak Type: Natural Gas

Vapors: Lighter than air and will generally rise and dissipate. May gather in a

confined space and travel to a source of ignition.

Health Hazards: Will be easily ignited by heat, sparks or flames and will form explosive mixtures with air. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at high concentrations. Contact with gas or liquefied gas may cause burns, severe injury and/or frostbite.

MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

Mission Valley Pipeline, LP invests significant time and capital maintaining the quality and integrity of their pipeline systems. Most active pipelines are monitored 24 hours a day via manned control centers. Mission Valley Pipeline, LP also utilizes aerial surveillance and/or on-ground observers to identify potential dangers. Control center personnel continually monitor the pipeline system and assess changes in pressure and flow. They notify field personnel if there is a possibility of a leak. Automatic shut-off valves are sometimes utilized to isolate a leak.

We have an integrity management program to evaluate the condition of our pipeline. We take extra measures to protect sections in zones known as high consequence areas (densely populated areas or places where people gather near the pipeline). The program includes
