MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

Texstar Midstream Logistics Pipeline, LP invests significant time and capital maintaining the quality and integrity of their pipeline system. Active pipelines are monitored 24 hours a day via manned control centers.

Texstar Midstream Logistics Pipeline, LP actively participates in Texas811, a qualified one-call center. Texstar Midstream Logistics Pipeline, LP also utilizes aerial surveillance and/or on-ground observers to identify potential dangers. Control center personnel continually monitor the pipeline system and assess changes in pressure and flow. They notify field personnel if there is a possibility of a leak. Automatic shut-off valves are sometimes utilized to isolate a leak.
