- Employees – inform supervisors of emergency
- Supervisors – assess the situation and keep lines of communication open to both on-site employees and operations management
- Provide input regarding the need for additional personnel, technical services, contract specialists, etc.
- Notify corporate management as appropriate as well as the Safety/ Environmental Specialist

SECURE SITE

- Control traffic
- Set up safe perimeter/evaluate wind (use gas detection meter)
- Cooperate with law enforcement and appropriate agencies
- Refer media to spokesperson

MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

The San Antonio Refinery, LLC invests significant time and capital maintaining the quality and integrity of their pipeline system. Active pipelines are monitored 24 hours a day via manned control centers.

The San Antonio Refinery, LLC actively participates in Texas811, a qualified one-call center. The San Antonio Refinery, LLC also utilizes aerial surveillance and/or on-ground observers to identify potential dangers. Control center personnel continually monitor the pipeline system and assess changes in pressure and flow. They notify field personnel if there is a possibility of a leak. Automatic shut-off valves are sometimes utilized to isolate a leak.

For more information on affected HCA segments or TSAR's Integrity Management Plan please contact Rolando Ayala at rolando.ayala@tsar-llc.com.
