

## Woodward Apple Springs, LLC

### WOODWARD APPLE SPRINGS PIPELINE

Woodward Apple Springs, LLC (WAS) is a gas gathering company that has 65 miles of pipeline in Angelina and Trinity counties. We have 4", 6" and 8" segments of line along the system with a number of 2" and 3" laterals.

### WHAT DOES WOODWARD APPLE SPRINGS PIPELINE DO IF A LEAK OCCURS?

When transporting natural gas and a leak occurs, our pipeline owner will be notified along with JJ Pipeline Maintenance, LLC. Woodward personnel will follow emergency procedures to segment off the affected line section, blow down the section and repair the leak. All proper authorities will be notified as well.

Pipeline operators and emergency responders are trained to protect life, property and facilities in the case of an emergency.

Pipeline operators will also take steps to minimize the amount of product that leaks out and to isolate the pipeline emergency.

### MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

Woodward Apple Springs, LLC invests significant time and capital maintaining the quality and integrity of its pipeline system. Most active pipelines are monitored 24 hours a day via manned control centers. WAS also utilizes aerial surveillance and /or on-ground observers to identify potential dangers. Currently the pipeline system is not transporting natural gas, but carries a static low pressure nitrogen pad to maintain the integrity and quality of the system to prevent internal corrosion and eliminate the need to continuously monitor pressure and flow. The company continues to comply with all applicable rules while actively pursuing new business opportunities.

### PRODUCTS TRANSPORTED IN YOUR AREA

**Product:** Natural Gas

**Leak Type:** Gas

**Vapors:** Lighter than air and will generally rise and dissipate. May gather in a confined space and travel to a source of ignition.

**Health Hazards:** Will be easily ignited by heat, sparks or flames and will form explosive mixtures with air. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at high concentrations. Contact with gas or liquefied gas may cause burns, severe injury and/or frostbite.
