

SUNOCO VIRGINIA BEACH TERMINALS

Sunoco operates a pipeline system consisting of the pipeline and the Virginia Beach terminal. Jet Fuel is delivered by barge to the terminal. The terminal stores the product and has a total storage capacity of approximately 40,000 barrels with an average storage volume of 20,000 barrels. Product is received via vessel and distributed by the Company-owned onshore transmission pipeline. The pipeline is 9.2 miles long, with a 6.62-inch diameter, and passes along the North Landing Road and Princess Anne Road along its path from the Terminal to Oceana Naval Air Station. The pipeline is coated, and equipped with cathodic protection and leak detection systems. The pipeline is buried in trenches to protect it from external disturbances with a 3-foot minimum cover in the rights-of-way.

SUNOCO, LLC

Sunoco, LLC is a wholly owned subsidiary of Sunoco LP. Sunoco LP (SUN) is a master limited partnership based in Dallas, Texas. Sunoco is the largest independent fuel distributor in the country and owns and operates two transmix processing facilities along with 23 refined product terminal facilities. Sunoco's operations also include transportation assets to support the distribution of motor fuel to approximately 10,000 convenience stores, independent dealers, commercial customers and distributors located in more than 30 states, including Hawaii. Sunoco LP's general partner is owned by Energy Transfer.
