Butch Green
Rt. 10 South
Pineville, WV 24874
304-732-9219

HOW TO RECOGNIZE A GAS PIPELINE LEAK

Although leaks on natural gas pipelines are not common, it is important to be able to recognize the warning signs of a possible leak.

- Dirt or rocks being blown into the air
- Water bubbling or being blown into the air at a pond, creek or river
- Fire coming from the ground or appearing to burn above it
- Dead vegetation on or near a right-of-way when the area around it is green
- Dead vegetation on or near a right-of-way when the area around it is green
- Dead vegetation on or near a right-of-way when the area around it is green
- An abnormal dry or frozen spot in a right-of-way
- A roaring or hissing sound near a right-of-way or other pipeline facility
- The presence of an unusual gas, petroleum, or "rotten egg" odor

IF YOU SUSPECT A GAS LEAK

- Turn off and abandon any motorized equipment
- Evacuate the area upwind if possible
- Warn others to clear the area

- When in a safe area, call the local fire or police department or 911 and the pipeline operator. Nytis/Cranberry Pipeline's Gas Control Center is manned 24 hours a day, seven days a week at **1-800-642-6300**
- **DO NOT** turn on or off electrical switches or cell phones
- **DO NOT** smoke or create any sources of ignition or combustion
- **DO NOT** attempt to operate pipeline valves no matter how minor you think the chances of danger, it does not pay to take needless risks

WHAT IS A PIPELINE EMERGENCY?

A pipeline emergency requiring the assistance of emergency officials may be, but is not limited to, one or more of the following situations:

- Gas detected inside or near a building
- Gas pipeline break
- Fire located near or directly involving a pipeline facility
- Explosion occurring near or directly involving a pipeline facility
- Natural disaster such as flood, tornado, mine subsidence, etc.

NYTIS EXP / CRANBERRY PIPELINE EMERGENCY RESPONSE

Nytis Exploration Company and Cranberry Pipeline Corporation have an established emergency response plan. Our control center is manned 24 hours a day 365 days a year and is able to implement our emergency response plan at any time. Our employees are trained and ready to respond to handle emergencies should one occur. When Nytis receives a report of an emergency involving our facilities, our employees may perform one or more of the following actions depending on the severity of the emergency:

- locate the site of the emergency and identify the facilities involved

EMERGENCY CONTACT:
1-800-642-0300

PRODUCTS/DOT GUIDEBOOK ID#/GUIDE#:		
Natural Gas	1971	115
WEST VIRGINIA COUNTIES OF OPERATION:		
Boone	Mercer	
Cabell	Mingo	
Calhoun	Nicholas	
Clay	Pleasants	
Doddridge	Putnam	
Fayette	Raleigh	
Gilmer	Ritchie	
Jackson	Roane	
Kanawha	Summers	
Lincoln	Tyler	
Logan	Wayne	
Mason	Wirt	
McDowell	Wyoming	

Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.

- Take actions to protect the public first and then the environment and property that may include:

1. Reducing or stopping the flow of gas
2. Establishing a restricted zone around the emergency site
3. Eliminating possible ignition sources in the area
4. Evacuating buildings within the restricted zone

- Notify appropriate emergency response officials as necessary
- Provide a company representative to work with emergency officials
- Repair the affected facilities and restore the flow of gas
- Investigate the cause of the incident

Nytis EXP / Cranberry Company may request assistance from emergency response agencies to perform one or more of the following:

- Establish a restricted zone around the emergency site
- Evacuate buildings in the restricted zone
- Eliminate potential ignition sources
- Search and rescue operations
- Control secondary fires
- Provide emergency medical services and evacuation

In the event that emergency response personnel are on scene before Nytis personnel, Nytis Exp / Cranberry Pipeline requests that you do not:

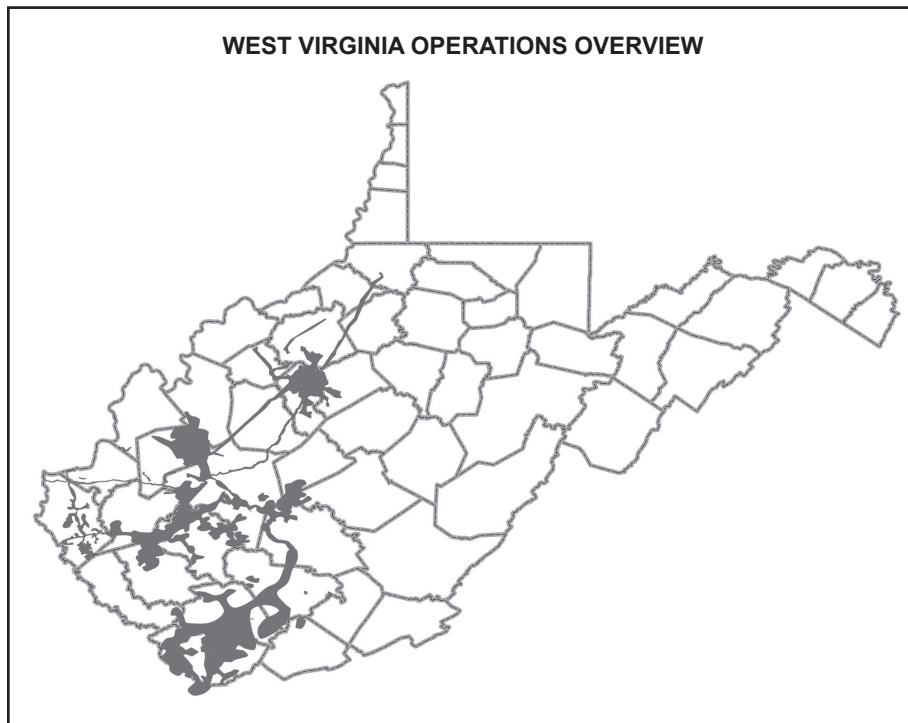

- Operate any pipeline or facility valves
- Extinguish gas fires on pipelines or facilities unless requested to do so by Nytis personnel

PIPELINE SAFETY

As required by state law, at least 48 hours, eXcLuding weekends and holidays, prior

to starting any excavation notify West Virginia 811 at 8-1-1 or 1-800-245-4848 so that any potentially conflicting buried pipelines or utilities may be located. If while digging, you hit or touch a pipeline or associated facility, you should stop digging and contact Nytis Exp / Cranberry Pipeline at 1-800-642-0300 immediately. It is important that Cabot inspect any potential damage. Even if there is no apparent leak or damage to the pipeline, it is possible that secondary damage away from the site could result in a leak. Even minor scratches, scrapes, gouges or dents may lead to a safety problem in the future. Any damage to a line must be reported to the facility owner by law.

If you require further information regarding Nytis Exploration Company or Cranberry Pipeline Corporation facilities in your area contact Nytis/Cranberry Pipeline's Gas Control Center at **1-800-642-0300** and you will be directed to the appropriate source.
