

**ABOUT CALIFORNIA NATURAL RESOURCES GROUP (CALNRG):**

California Natural Resources Group (CalNRG) produces California oil and gas in accordance with some of the strictest environmental regulations in the world, across the Federal, State, and Local governments. CalNRG believes the key to California’s economic prosperity depends on expanding the supply of locally produced oil and gas and continuing to care for our local resources in the only way we know how – by being diligent operators, environmental stewards, and community members.

**WHAT DOES CALIFORNIA NATURAL RESOURCES GROUP (CALNRG) DO IF A LEAK OCCURS:**

To prepare for the event of an incident or leak, pipeline companies regularly communicate, plan and train with local emergency responders. Upon notification of an incident or leak the pipeline company will immediately dispatch trained personnel to assist emergency responders.

Pipeline operators and emergency responders are trained to protect life, property and facilities in the case of an emergency.

Pipeline operators will also take steps to minimize the amount of product that leaks out and to isolate the pipeline emergency.

**MAINTAINING SAFETY AND INTEGRITY OF PIPELINES:**

California Natural Resources Group (CalNRG) invests significant time and capital maintaining the quality and integrity of their pipeline systems. Hazard analyses, integrity tests and maintenance are performed on a routine basis. Personnel and equipment monitor pipeline conditions 24 hours a day.

Both manual and automatic valves and systems are utilized to isolate a leak. California Natural Resources Group (CalNRG) maintains an Integrity Management Program (IMP) that assesses pipelines and outlines the necessary maintenance and integrity preventative measures.

**HOW TO GET ADDITIONAL INFORMATION:**

For more information about the California Natural Resources Group (CalNRG) program, please contact us at 805-477-9805.

<b>PRODUCTS/ DOT GUIDEBOOK ID#/ GUIDE#:</b>		
Crude Oil	1267	128
Natural Gas	1971	115

**CALIFORNIA COUNTIES OF OPERATION:**

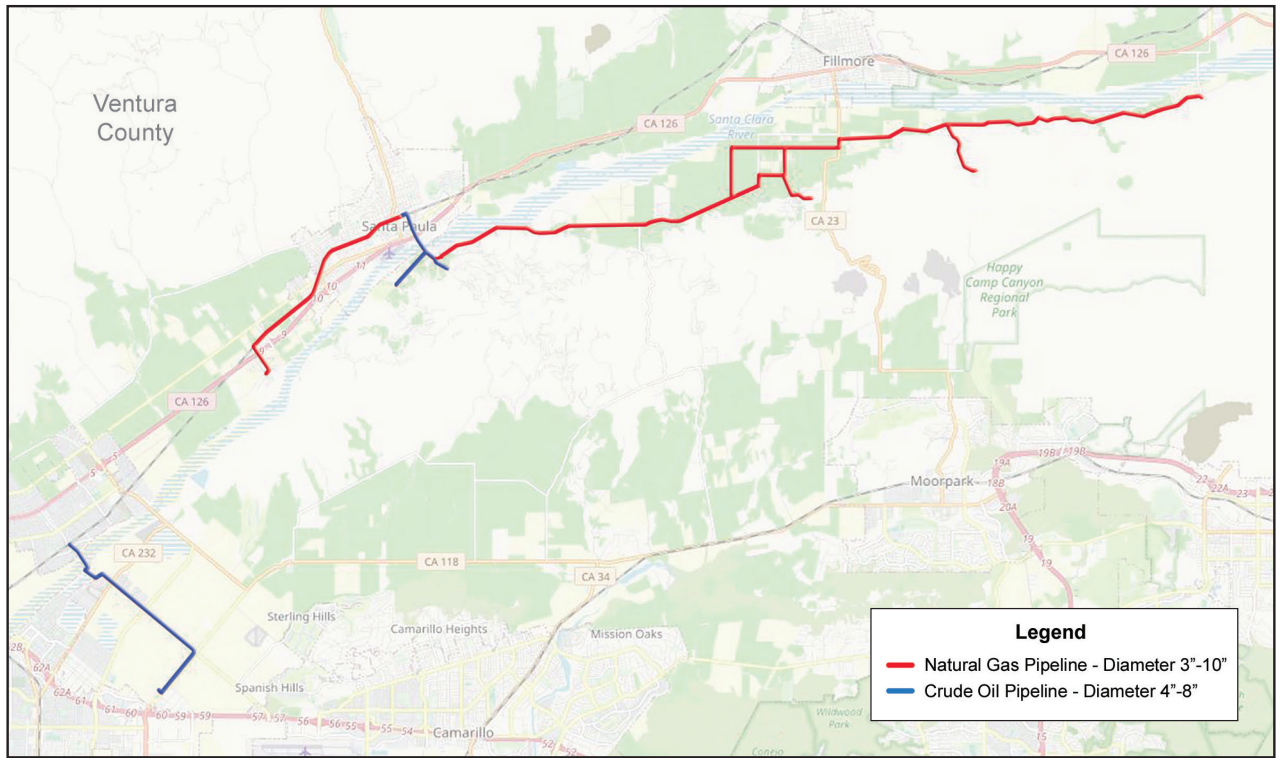

Orange                      Ventura

*Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.*

**PRODUCTS TRANSPORTED IN YOUR AREA**

PRODUCT	LEAK TYPE	VAPORS
<b>HAZARDOUS LIQUIDS [CRUDE OIL]</b>	Liquid	Initially heavier than air and spread along ground and collect in low or confined areas. Vapors may travel to source of ignition and flash back. Explosion hazards indoors, outdoors or in sewers.
<b>HEALTH HAZARDS</b>	Inhalation or contact with material may irritate or burn skin and eyes. Fire may produce irritating, corrosive and/or toxic gases. Vapors may cause dizziness or suffocation. Runoff from fire control or dilution water may cause pollution.	
<b>NATURAL GAS</b>	Gas	Lighter than air and will generally rise and dissipate. May gather in a confined space and travel to a source of ignition.
<b>HEALTH HAZARDS</b>	Will be easily ignited by heat, sparks or flames and will form explosive mixtures with air. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at high concentrations. Contact with gas or liquefied gas may cause burns, severe injury and/or frostbite.
