

CHEVRON PIPELINE & POWER EMERGENCY RESPONSE CAPABILITIES

COMMITMENT

Chevron Pipeline & Power is committed to the protection of the public and the environment through the safe operation and maintenance of its pipeline systems. CPP's qualified personnel are trained in emergency response activities and regularly participate in drills and exercises reflecting various types of response levels, emergency scenarios, topographic terrain and environmental sensitivities.

CPP has committed the necessary resources to fully prepare and implement its emergency response plans and has obtained through contract the necessary private personnel and equipment to respond, to the maximum extent practicable, to a "worst case" discharge or substantial threat of such a discharge.

COMMUNICATIONS

CPP utilizes its 24-hour Pipeline Control Center (1-800-762-3404) as a hub of communications in emergency response situations. The Control Center has a vast catalog of resources and capabilities. On-site communications are conducted using cellular telephones, 6GigHz analog 120 channel microwave radios (in Company vehicles), portable Motorola radios, and/or land-line telephone systems from Company facilities and offices.

INCIDENT COMMAND SYSTEM

CPP utilizes an expandable Incident Command System. Depending upon the size and complexity of an incident, additional Company or contract personnel may be added as needed.

Additional federal, state or local agencies may be integrated into the Incident Command System by utilizing a Unified Command Structure.

SPILL RESPONSE EQUIPMENT

CPP maintains emergency supplies and equipment at strategically located facilities. This includes spill booms (of various types, sizes and lengths as needed in different areas), sorbent materials, boats, motors, hand tools, power tools, pumps, hoses, personal protective equipment, first aid and miscellaneous supplies.

OIL SPILL CONTRACTORS

Certified Oil Spill Response Organizations (OSROs) are under contract by CPL. These consultants can provide expertise and support in areas including emergency response management, environmental services, site assessment, permitting, waste treatment, recycling, dewatering, hazardous waste disposal, and remediation.

EMERGENCY RESPONDERS

We are committed to the safety of our emergency responders and the communities you serve. We want to provide you with information to keep you and your community safe by making our Emergency Response Plans available to you and your agency through our **Emergency Response Portal (ERP™)**.

In this portal you will find mapping of our assets, a copy of our Emergency Response Plans, and other safety information including emergency contact information.

Use the QR Code to register for access to our Emergency Response Plans.
