

**ABOUT LODI GAS STORAGE**

Lodi Gas Storage, a Rockpoint Gas Storage Company, is a natural gas storage utility company that has been operating in Northern California since 2002. Lodi Gas Storage, or LGS, serves the PG&E Citygate marketplace with direct connections to Lines 400 and 401 with pipelines ranging in size from 12" - 30".

LGS's original facility, which has been in service since 2002, is located approximately 30 miles south of Sacramento, near Lodi, California. The Company completed its first expansion project, known as Kirby Hills Phase I, in the Montezuma Hills, nine miles southeast of Fairfield, California, in 2006. LGS substantially completed a second expansion project, known as Kirby Hills Phase II, in 2009. These facilities collectively have a maximum injection and withdrawal capability of approximately 550 million cubic feet per day ("MMcf/day") and 750 MMcf/day, respectively. LGS's facilities are designed to provide high deliverability natural gas storage service and have a proven track record of safe and reliable operations.

Lodi is regulated by the California Public Utilities Commission. All services are contracted under the Company's California Public Utilities Commission Tariff.

Pipeline operators and emergency responders are trained to protect life, property and facilities in the case of an emergency.

Pipeline operators will also take steps to minimize the amount of product that leaks out and to isolate the pipeline emergency.

**MAINTAINING SAFETY AND INTEGRITY OF PIPELINES**

Lodi Gas Storage invests significant time and capital maintaining the quality and integrity of their pipeline systems. Most active pipelines are monitored 24 hours a day via manned control centers. Lodi Gas Storage also utilizes aerial surveillance and/or on-ground observers to identify potential dangers. Control center personnel continually monitor the pipeline system and assess changes in pressure and flow. They notify field personnel if there is a possibility of a leak. Automatic shut-off valves are sometimes utilized to isolate a leak.

Gas transmission pipeline operators have developed supplemental hazard and assessment programs known as

**WHAT DOES LODI GAS STORAGE DO IF A LEAK OCCURS?**

To prepare for the event of a leak, pipeline companies regularly communicate, plan and train with local emergency responders. Upon the notification of an incident or leak the pipeline company will immediately dispatch trained personnel to assist emergency responders.
