

**ABOUT ARB MIDSTREAM, LLC**

ARB Midstream, LLC (ARB), headquartered in Denver, CO, ARB provides crude oil gathering services across North America that are strategically located to provide the best market access, and are tailored to our customers' specific needs. We partner with producers of all sizes to optimize their transportation options. Our assets include a crude oil gathering system in the prolific Denver-Julesburg Basin, which is home to the Niobrara and Wattenberg plays in Larimer and Weld County, Colorado. ARB owns and operates Platte River Midstream, a crude oil transmission and gathering system of various size pipelines spanning nearly 100 miles in the Rocky Mountain region of the United States.

ARB's employees and its pipeline system and facilities are located throughout Northern Central Counties in Colorado.

**WHAT DOES ARB DO IF A LEAK OCCURS?**

To prepare for the event of a leak, pipeline companies regularly communicate, plan and train with local emergency responders. Upon the notification of an incident or leak the pipeline company will immediately dispatch trained personnel to assist emergency responders.

Pipeline operators and emergency responders are trained to protect life, property and facilities in the case of an emergency.

Pipeline operators will also take steps to minimize the amount of product that leaks out and to isolate the pipeline emergency.

**MAINTAINING SAFETY AND INTEGRITY OF PIPELINES**

ARB invests significant time and capital maintaining the quality and integrity of their pipeline systems. ARB also utilizes aerial surveillance and/or on- ground observers to identify potential dangers. ARB personnel continually monitor the pipeline system and assess changes in pressure and flow. They will immediately respond if there is a possibility of a leak. Automatic shut-off valves are sometimes utilized to isolate a leak.

**PRODUCTS TRANSPORTED IN YOUR AREA**

PRODUCT	LEAK TYPE	VAPORS
CRUDE OIL	Liquid	May ignite on surfaces at temperatures above auto-ignition temperature. Flammable vapors may be present even at temperatures below the flash point. This material is a static accumulator. Even with proper grounding and bonding, this material can still accumulate an electrostatic charge. If sufficient charge is allowed to accumulate, electrostatic discharge and ignition of flammable air-vapor mixtures can occur.
HEALTH HAZARDS		Inhalation or contact with material may irritate or burn skin and eyes. Fire may produce irritating, corrosive and/or toxic gases. Vapors may cause dizziness or suffocation. Runoff from fire control or dilution water may cause pollution.

**EMERGENCY CONTACT:**
