

**COMMITMENT**

Chevron Pipe Line Company is committed to the protection of the public and the environment through the safe operation and maintenance of its pipeline systems. CPLC's qualified personnel are trained in emergency response activities and regularly participate in drills and exercises reflecting various types of response levels, emergency scenarios, topographic terrain and environmental sensitivities.

CPLC has committed the necessary resources to fully prepare and implement its emergency response plans and has obtained through contract the necessary private personnel and equipment to respond, to the maximum extent practicable, to a "worst case" discharge or substantial threat of such a discharge.

**WHAT ARE THE SIGNS OF A PIPELINE LEAK?**

- Continuous bubbling or blowing water in wet or flooded areas
- Oily or rainbow sheen on water surface
- A pool of liquid on the ground
- Vaporous fogs or blowing dirt around a pipeline area or hole in the ground
- Dead or discolored plants in an otherwise healthy area
- Frozen ground in warm weather

**WHAT SHOULD I DO IF I SUSPECT A PIPELINE LEAK?**

Your personal safety should be your first concern:

- Evacuate the area and prevent anyone from entering
- Abandon any equipment being used near the area
- Avoid any open flames
- Avoid introducing any sources of ignition to the area (such as cell phones, pagers, 2-way radios)
- Do not start/turn off motor vehicles/ electrical equipment

- Call 911 or contact local fire or law enforcement
- Notify the pipeline company
- Do not attempt to extinguish a natural gas fire
- Do not attempt to operate any pipeline valves

**PIPELINE SAFETY**

System failures occur infrequently along the nation's network of interstate natural gas pipeline facilities, and many of these are caused by damage from others digging near the pipeline. We watch for unauthorized digging, but we request your help to notify us.

**ALWAYS CALL 811 BEFORE YOU DIG!**

**PIPELINE LOCATION AND MARKERS**

Pipeline markers are used to indicate the approximate location of a natural gas pipeline and to provide contact information. Aerial patrol planes also use the markers to identify the pipeline route. Markers should never be removed or relocated by anyone other than a pipeline operator.

You can also find out where other companies' pipelines are in your area by going to the National Pipeline Mapping System website at [www.npms.phmsa.dot.gov](http://www.npms.phmsa.dot.gov).

**COMMUNICATIONS**

CPLC utilizes its 24-hour Pipeline Control Center (1-800-762-3404) as a hub of communications in emergency response situations. The Control Center has a vast catalog of resources and capabilities. On-site communications are conducted using cellular telephones, 6GigHz analog 120 channel microwave radios (in Company vehicles), portable Motorola radios, and/or land-line telephone systems from Company facilities and offices.

**COLORADO COUNTIES OF OPERATION:**

Adams	Rio Blanco
Broomfield	Weld
Larimer	

*Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.*

**INCIDENT COMMAND SYSTEM**

CPLC utilizes an expandable Incident Command System. Depending upon the size and complexity of an incident, additional Company or contract personnel may be added as needed.

Additional federal, state or local agencies may be integrated into the Incident Command System by utilizing a Unified Command Structure.

**SPILL RESPONSE EQUIPMENT**

CPLC maintains emergency supplies and equipment at strategically located facilities. This includes spill booms (of various types, sizes and lengths as needed in different areas), sorbent materials, boats, motors, hand tools, power tools, pumps, hoses, personal protective equipment, first aid and miscellaneous supplies.

**OIL SPILL CONTRACTORS**

Certified Oil Spill Response Organizations (OSROs) are under contract by CPLC. These consultants can provide expertise and support in areas including emergency response management, environmental services, site assessment, permitting, waste treatment, recycling, dewatering, hazardous waste disposal, and remediation.

**EMERGENCY RESPONDERS**

We are committed to the safety of our emergency responders and the communities you serve. We want to provide you with information to keep you and your community safe by making our Emergency Response Plans available to you and your agency through our **Emergency Response Portal (ERP™)**.

In this portal you will find mapping of our assets, a copy of our Emergency Response Plans, and other safety information including emergency contact information.

Use the QR Code to register for access to our Emergency Response Plans.
