MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

Tumbleweed Midstream invests significant time and capital maintaining the quality and integrity of their pipeline system. Active pipelines are monitored 24 hours a day via manned control centers.

Tumbleweed Midstream participates in Colorado 811, a qualified one-call center and utilizes aerial surveillance and/or non-ground observers to identify potential dangers. Control center personnel continually monitor the pipeline system and assess changes in pressure and flow. They notify field personnel if there is a possibility of a leak. Automatic shut-off valves are sometimes utilized to isolate a leak.
